(-----MCA-----)

MCA 2013-2014 (~~PREVIOUS~~)-I/II SEMESTER

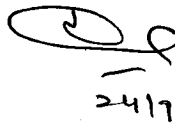

MCA 2014-2015 (~~FINAL~~)- III/IV SEMESTER

MCA 2015-2016 V/VI Semester

(~~Secretariat~~)

Prepared by

  
16/9

  
24/17

⑧ MCA I, II, III, IV, V, VI Semester

0.50 to 1.49	E	Poor	25-33
0.00 to 0.49	F	FAIL	0-24

Thus the percentage will be obtained by using this table

2013-2016

CGPA	%	CGPA	%	CGPA	%
6	100	4	60	2	39
5.9	95	3.9	59	1.9	37.8
5.8	90	3.8	58	1.8	36.6
5.7	85	3.7	57	1.7	35.4
5.6	80	3.6	56	1.6	34.2
5.5	75	3.5	55	1.5	33
5.4	74	3.4	54	1.4	32.2
5.3	73	3.3	53	1.3	31.4
5.2	72	3.2	52	1.2	30.6
5.1	71	3.1	51	1.1	29.8
5	70	3	50	1	29
4.9	69	2.9	49	0.9	28.2
4.8	68	2.8	48	0.8	27.4
4.7	67	2.7	47	0.7	26.6
4.6	66	2.6	46	0.6	25.8
4.5	65	2.5	45	0.5	25
4.4	64	2.4	43.8	0.4	20
4.3	63	2.3	42.6	0.3	15
4.2	62	2.2	41.4	0.2	10
4.1	61	2.1	40.2	0.1	5

The enhancement of CGPA by 0.01 will enhance percentage as given below:

Grade	SGPA or CGPA	Percentage enhancement on 0.01 CGPA enhancement
O	5.50 to 6.00	0.5
A	4.50 to 5.49	0.1
B	3.50 to 4.49	0.1
C	2.50 to 3.49	0.1
D	1.50 to 2.49	0.12
E	0.50 to 1.49	0.08
F	0.00 to 0.49	0.5

For example (i) CGPA of 5.73 is equivalent to 86.5%, (ii) CGPA of 5.12 is equivalent to 71.2%, (iii) CGPA of 4.34 is equivalent to 63.4%, (iv) CGPA of 3.26 is equivalent to 52.6%, (v) CGPA of 2.17 is equivalent to 41.04%, and (vi) CGPA of 1.11 is equivalent to 29.88%.

## 2. Eligibility:

All the graduate (with 10+2+3) with at least 50% marks or CGPA of 3.0 in the UGC Seven Point scale [45% marks or CGPA 2.5 in the UGC Seven Point Scale for

Meditate

SC/ST/Non-Creamy layer OBC] in aggregate with mathematics either at XII level or graduation level or BCA/B.Sc. (IT)/ B.Sc.(CS) or B.E. from recognized university in Rajasthan and min. 60% marks for Non- Rajasthani Candidate. Reservation as per University Rules.

**3. Scheme of Examination:**

- (1) Each theory paper EoSE shall carry 100 marks The EoSE will be of 3 hours duration. Part 'A' of theory paper shall contain 10 Short Answer Questions of 20 marks, based on knowledge, understanding and applications of the topics/texts covered in the syllabus. Each question will carry two marks for correct answer.
- (2) ~~Part "B" of paper will consisting of Four questions with internal choice (except in cases where a different scheme is specifically specified in the syllabus - of 20 mark each. The limit of answer will be five pages.~~
- (3) Each Laboratory EoSE will be of four/six hour durations and involve laboratory experiments/exercises, and viva-voce examination with weightage in ratio of 75:25.

**4. Course Structure:**

The details of the courses with code, title and the credits assign are as given below.

Abbreviations Used

**Course Category**

CCC: Compulsory Core Course

ECC: Elective Core Course

OEC: Open Elective Course

SC: Supportive Course

SSC: Self Study Core Course

SEM: Seminar

PRJ: Project Work

RP: Research Publication

**Contact Hours**

L: Lecture

T: Tutorial

P: Practical or Other

S: Self Study

**Relative Weights**

IA: Internal Assessment (Attendance/Classroom Participation/Quiz/Home Assignment etc.)

ST: Sessional Test

EoSE: End of Semester Examination

Part B of the paper shall contain four questions. one question will be set from each unit. Each question will have three parts. Candidates are required to attempt all four units by taking any two parts from each question of 20 marks. ~~Each~~ questions carry

MCA D03	ECC	Web Information System	V
MCA D04	ECC	Pattern Recognition Systems	V

## MCA101: Computer Architecture

### Unit – I

Logic gates, basic combinational logic, Boolean functions & Expressions, multiplexer, decoders, encoders comparators, adder and substructures, BCD to 7 segment decoder, sequential circuits, RS, JK, D and T flip flops, counter and shift register. Clock and Timing events.

### Unit – II

Addressing methods and machine program sequencing-memory locations addresses, encoding of information, instructions types, Instruction format, and instructions sequencing, addressing modes, paging, relative, indirect and indexed addressing.

Basics of Computer organization: System buses and instruction cycles, memory subsystem organization and interfacing, I/O subsystem organizations and interfacing, Register transfer languages.

### Unit – III

CPU design: Specifying a CPU, design and implementation of a simple CPU (fetching instructions from memory, decoding and executing instructions. establishing required data paths, design of ALU, Number representation, Arithmetic operations, floating point arithmetic, design of the control unit and design verification), design and implementation of a simple micro-sequencer.

### Unit – IV

Memory Organization : Main memory concepts, Auxiliary memory, Associative memory, virtual memory & paging and cache memory organization.

Input and Output organization: Asynchronous data transfer, programmed I/O Interrupts (types, processing of interrupts implementing interrupts inside CPU) Direct memory access, I/O processors, serial communication.

*P. Mohan*  
20/5/11

Recommended reference/text books

1. John D. Carpinelli: Computer Systems Organization & Architecture; 3<sup>rd</sup> Edition; Person Education Asia, 2008.
2. M. Morris Mano : Computer System Architecture; III Edition; Prentice Hall of India, 2008.
3. Malvino B.; Digital Computer Electronics; III Edn; TMH.
4. John P. Hayes, Computer Architecture and Organization, McGraw Hill International Edition.
5. Vincent J P Heuring and Harry E Jordan: Computer Systems Design & Architecture, Addison Wesley, Pearson Education Asia.

## MCA 102: Operating System Fundamentals

### Unit - I

Necessity of an Operating system, Operating system structure, Evolution of Operating Systems (multiprogramming systems, batch systems, timesharing system, distributed systems and Real-time system). Operating system structure, Operating system components and services. System calls, system programs, Virtual machines.

### Unit - II

Process Management: Process concept, Process scheduling, Cooperating processes, Threads, Inter-process communication, CPU scheduling criteria, Scheduling algorithms, Multiple-processor scheduling, Real-time scheduling and Algorithm evaluation.

Process Synchronization and Deadlocks: The Critical-Section problem, synchronization hardware, Semaphores, Classical problems of synchronization, Critical regions, Monitors, Deadlocks-System model, Characterization, Deadlock prevention, Avoidance and Detection, Recovery from deadlock, Combined approach to deadlock handling.

### Unit - III

Storage management: Memory Management-Logical and Physical Address Space, Swapping, Contiguous Allocation, Paging, Segmentation with paging, Virtual Memory, Demand paging and its performance, Page replacement algorithms, Allocation of frames, Thrashing, Page Size and other considerations, Demand segmentation, File systems, secondary Storage Structure, File concept, access methods, directory implementation, Efficiency and performance, recovery, Disk structure, Disk scheduling methods, Disk management, Recovery, Disk structure, disk scheduling methods, Disk management, Swap-Space management, Disk reliability.

### Unit - IV

Goals of Protection, Domain of protection, The Security problem, Program threats, Authentication, One Time passwords, Program threats, System threats, Threat Monitoring, Encryption. Computer Security techniques.

*P. J. Shaw*  
20.8.11

Case Study : Windows NT – Design principles, System components, Environmental subsystems, File system, Networking and program interface.

**Recommended books:**

1. Galvin P.B., Silberschatz ; Operating System Principles; (Seventh Edition); J. Wiley, 2008.
2. William Stalling; Operating Systems : Internal & Design Principles; Sixth Edn; Pearson., 2009.
3. Gary Nutt: Operating Systems-A Modern Perspective (Second Edition), Pearson Education, 2008.
4. Tanenbaum A.S., Modern Operating Systems, 2<sup>nd</sup> Edn., PHI Publ, 2003.
5. D.M. Dhamdhare: Systems Programming and Operating Systems (Second Edition), Tata Mc-Graw Hill Publishing Company Limited.
6. Harvey M. Deitel, Operating Systems, Pearson Education.

## MCA 103: Database Management Systems

### Unit - I

Overview of DBMS : Basic concepts, Database system architecture, Schemas, Instances, Components, Database users, Three-tier architecture, Centralized, Distributed and Client/Server architecture, Data independence. Database models: Entity relationship model, hierarchical model, relational model, network model, Object-Oriented data model.

Data Modeling using ER Model : ER model concepts, ER diagram, mapping constraints, Keys, Generalization, aggregation, reduction of ER diagrams to tables, extended ER model, Relationship of higher degree. Enhanced ER Model : Concepts, Specialization, Generalization, Data abstraction, Knowledge representation and University EER Model as example.

### Unit - II

Relational Model : Concepts, Constraints, languages, Relational database design by ER & EER mapping; Relational algebra, relational calculus.

Normalization : Functional dependencies, Normal forms – First, second, third and BCNF, inclusion dependencies, loss less join & decompositions, normalization using FD, MVD, and JDs, Alternative approach to database design.

### Unit - III

Data storage : Magnetic disk and flash storage, RAID technology, tertiary storage. Indexing structure- Single and multiple level.

Transaction processing : Transactions atomicity, durability, serializability and isolation. Concurrency control techniques – Two phase locking, timestamp ordering, multiversion,

*P. Mohan*  
2008.11

granularity locking techniques. Database recovery techniques based on deferred & immediate updates and shadow paging.

#### Unit - IV

SQL: Characteristics of SQL, advantages, data types in SQL, SQL Operators, types of SQL commands, Tables, Indexes, Views, Nulls, Aggregate Functions, Select statement, Sub queries, Insert, Update and Delete operations, Joins, Unions. Introduction to Embedded SQL, Dynamic SQL & SQLJ. Data security, integrity and concurrency, Backup and recovery, numeric and text data in SQL, dealing with dates, Synonyms, Snapshots, Programming with SQL.

#### Reference Books :

1. Korth H F and Silberschatz A, Database System Concepts, Sixth Edition; McGraw Hill, 2006.
2. Navathe S.B., Elmasri R.; Fundamentals of Database Systems, Fifth Edition; Pearson. 2009.

6. Date C J, Database Management Systems, Pearson Education Asia.
7. Singh S.K.; Database Systems; I Edition; Pearson, 2006.

### MCA 104: Algorithm and Data Structures

#### Unit - I

Algorithms, pseudo code, efficiency of algorithms, analyzing algorithms and problems, complexity measures, basic time analysis of an algorithm, space complexity. Data abstraction and basic data structures, data types and abstract data types.

Basic data structure – Arrays, Stack, Queues and their applications, linked and sequential representation of arrays, stacks & queue.

#### Unit - II

Linked lists, representation of linked list in memory. insertion, deletion and searching of linked list, two way lists. Arithmetic expressions, Polish notations, dequeue and priority queues.

Trees : Basic concepts, linked representation, representation in continuous memory. Binary and N-ary trees, Searching, insertion and deletion in binary search tree, traversing algorithms

*P. Mohan*  
20/8/11

using stacks, header nodes, threads.

**Unit – III**

Graphs and their representations, sequential representation- Adjacent matrix, linked representation of graphs, operations on graph, , traversing a graph. DFS and BFS algorithms. Heap structures , heap sort algorithm.

**Unit – IV**

Sorting and Searching: Use various data structures for searching and sorting, Internal and external sorting techniques, linear and binary search, Hash tables & Hashed searching, Bubble sort, Insertion sort, Selection sort, Merge sort, Radix sort, quick sort.

*Recommended reference books*

5. A. Michael Berman: Data Structures via C++. Oxford University Press.
6. Jean-Paul Tremblay and Paul G. Sorenson, An Introduction to Data structures with applications, TMH Publishing Co.Ltd.

**MCA 105: Programming in C**

**Unit – I**

Problem solving with computers, Flow charts, Basic concepts of programming languages, Programming domains.

C Character set, variables and constants, keywords, Type checking, Scope and lifetime data types. Operators, Instructions, assignment statements, arithmetic expression, comment statements, simple input and output, Boolean expressions.

**Unit – II**

Control structures, decision control structure, loop control structure, case control structure. String and character handling, arrays and string processing, data validation examples. Functions, function prototype, subroutines, scope and lifetime of identifiers, parameter passing mechanism, recursion.

**Unit – III**

User defined data types, enumerated data types., unions, structures, array of structures,

*P. Khan  
20.9.11*

19

Unions of structures. Storage class specifiers, Pre processors, header files and standard lib. Functions.

Pointers : Definition and uses of pointers, pointer arithmetic, pointers and arrays, pointers and functions, pointer to pointer, pointer to structures. Dynamic memory allocation.

#### Unit – IV

Console Input and Output functions, data files, operations on data files, text and binary files, formatted data files.

Implementation of simple data structures : Stacks, Queues, Linked Lists, trees, searching and sorting algorithms.

Interaction with hardware, system calls, command line arguments, operations on bits, Bit-fields. Graphics in C

#### *Recommended reference books*

- 2 Balagurusamy E.; Programming in ANSI C ;Fifth Edn; Mc Graw Hill,2011.
- 3 Kanetkar Y.; LET US C; X Edition; BPB,2010.
- 4 Deitel HM & Deitel JP; C How to Program; 5<sup>th</sup> Edn; Pearson Pub.

### MCA 106: Discrete Mathematics

#### Unit – I

Set Theory: Ordered set, Cartesian product of sets, partition of set, countable and uncountable sets, Russell's paradox, principle of inclusion-exclusion, mathematical induction.

Relations and Function: Binary relation, n-ary relation, representation of a relation by a directed graph and matrix, equivalence relation, partial order relation, partially ordered set, total order relation, dual of partial order relation, hasse-diagram, chains and anti-chains.

Modules function, greatest integer function, hash function, composition of function, pigeonhole principle.

Groups, Rings And Fields: Definition and simple examples of Groups, Rings, Integral Domains, fields.

#### Unit – II

Logic & Proofs: Propositions, Basic logical operations, truth tables, Logical equivalence, Algebra of Propositions, conditional and Bi-conditional propositions, De Morgan laws for logic, Tautologies & contradiction, Quantifiers, Arguments, Logic Inference, Direct Proofs, Proof by contradiction.

P. V. Chow  
20/5/11

Lattices, Boolean Algebras, Switching Circuits & Digital Logic Gates: Definition & examples of lattices, Elementary properties of lattices, Distributive lattice, Bounded lattice, Complemented lattice, Dual of lattice.

Boolean Algebra, Boundaries laws, absorption laws, Idempotent laws, Involution laws, cancellation laws, associative laws, De' Morgan's laws, Boolean expressions and functions, Disjunctive normal form, conjunctive normal form.

Switching circuits, Equivalent switching circuits, combination of switches, digital logic gates.

### Unit – III

Graph Theory: Simple and multi-graph, Types of simple graph (Regular graph, complete graph, Bipartite graph, cycle, wheel, planar graph, complementary graph) directed graph, Connectedness, in graph, Euler graph, Hamiltonian graph weighted graph, shortest path problems, traveling salesman problems, Euler formula, operations on graphs, sub graph colouring of graphs, chromatic number.

Trees: Properties of Trees, eccentricity of vertex, centre of graph, Radius & diameter of graph, sub tree, Rooted tree, Binary tree, M-ary tree, Height of Binary tree, Spanning tree, Kruskal's Algorithm, Minimal spanning tree

### Unit – IV

Recurrence Relation & Generating Function: Discrete numeric function, generating function, Recurrence relations, Homogeneous linear Recurrence relation with constant coefficients.

Finite State Machine: Finite state machines as models of physical systems, equivalent machine, finite state machine as language recognizes, finite state language & type-3 languages.

## MCA 111: Programming in C & DS Lab

Practical Lab  
Examination : Practical Examination

P. Mohan  
20/5/11

20

Lab Exercises based on Theory paper MCA 104 and MCA 105

### **MCA 112: DBMS Lab**

Practical Lab :)  
Examination : Practical Examination

Lab Exercises based on Theory paper MCA 103

### **MCA 113: Office Management Lab**

Practical Lab  
Examination : Practical Examination

Word processing, Spread sheet program, data processing, Presentation Program, Web Surfing and other Internet services.

### **MCA 201: Object Oriented Programming Using C++**

#### **Unit – I**

Need of Object Oriented Programming, Advantages of OOP, Comparison of Functional Programming and OOP Approach, Essentials of OOP (Objects, classes, Encapsulation, Data abstraction, Inheritance, Reusability, Polymorphism, Delegation, Message Communication).

C++ Basics : Preprocessors, Comments, Data types, Operators, Expressions, Loops and Decisions, Arrays and String handling, Modular Programming with Functions, Structure and Unions.

#### **Unit – II**

Pointers and Run time binding, Dynamic memory allocation, Storage class specifiers. Classes, Member functions, Objects, Arrays of objects. Pointers : Addresses and pointers, pointer & arrays, pointer & functions, use of pointers in strings and pointers to objects. and Classes, Nested classes, Constructors, Destructors, Inline member functions, Friend Functions, Static member function.

Inheritance, Single Inheritance, types of base classes, types of derivations, multiple inheritance, container classes, member access control.

#### **Unit – III**

P. N. Dhanu  
20/8/11

Functions Overloading, Operator Overloading, polymorphism, early binding, polymorphism with pointers, Unary and Binary Operator Overloading, Overload Assignment Operator, Copy Constructor, Data Conversion between Objects of different classes. C++ Free Store.

Virtual Function : Virtual function, late binding, pure virtual functions, Abstract classes, Generic Programming with Templates, Friend functions, Overloaded Function Templates, Multiple Arguments function Template.

#### Unit – IV

Stream Computation with Console, Stream Computation with Files, opening and closing of files, stream state member functions, binary file operations, structures and file operations, classes and file operations, random access file processing. Exception handling : Exception handling mechanism, Throwing mechanism, Catching mechanism. Implementation of basic data structures in C++ such as arrays, stack , queues, linked list and sequential representation.

#### Recommended Books

1. Herbert Schildt; C++ : The Complete Reference; 4<sup>th</sup> Edn; TMH, 2003.
2. Robert Lafore; Object Oriented Programming in C++; 4<sup>th</sup> Edition; Techmedia
3. Balagurusamy E.; Object Oriented Programming C++; 4<sup>th</sup> Edition; TMH, 2009.
4. Venugopal, Rajkumar; Mastering C++; Tata Mcgrow Hill, 2006.
5. Kanetkar Y.; LET US C++; BPB; 2009.
6. Deitel and Deitel: How to Program C++, addison Wesley, Pearson Education Asia
7. John R. Hubbard, Programming with C++, McGraw Hill International.

### MCA 202: System Analysis and Design

#### Unit - I

System Concepts and the Information Systems Environment: The System concept, Definition, System, Central Objectives, Elements of a system, Environment , Boundaries and Interfaces. Types of systems – Physical or Abstract systems, Open or Closed systems, Role, Need and Responsibility of System Analyst, Introduction to System Development Approaches – Data Oriented and Object Oriented.

#### Unit - II

System Development Life Cycle : Linear or Waterfall Cycle, Linear cycle phase, problem definition, system specification. System study, Analysis, Design, Development, Implementation, Testing, Maintenance, Documentation.

System Planning and Analysis : Strategies for determining information requirement, Problem definition & Project initiation, Background analysis, Data and Fact Gathering Techniques, Feasibility Studies-Technical, Operational, economic, Cost benefit analysis.

Interface design tools, user interface evaluations, Introduction to Process Modeling,

*P. N. S. Gow*  
209-11

### Unit - III

System Design : Process modeling, Physical and logical design, Conceptual data modeling, Entity Relationship analysis, ER modeling, Context diagram,. Tools of structured analysis ( DFD, Data Dictionary, Decision Tree, Decision tables, Structured English). Structure Charts, Modules, Parameter passing. Execution sequence, Structured Design, Conversion from Data Flow Diagrams to Structure Charts.

Input/ Output Forms Design : Requirement of forms design, User Interface Design, Input design, CRT Screen forms design, Output design.

### Unit - IV

Files organization and Database Design : Designing of Fields, Physical records, Physical files, Database design, Data Structures, Normalization. Introduction to CASE Tools, Features, advantages, and limitations of CASE tools.

System Implementation, Maintenance and documentation, Testing, Evaluation, Maintenance Activities, Documentation, Document Configuration Maintaining a configuration.

Computer system audit and Security : Uses of Computer system audit, Types of threats to Computer system and Control measures, Threat and Risk Analysis, Disaster Recovery and Consistency planning.

### Recommended Books

## MCA 203- COMPUTER ORIENTED NUMERICAL METHODS

### Unit – I

Floating Point Arithmetic- Representation, Operation, Normalization; Pitfalls of Floating-point Representation, Errors in Numerical computation, Measures of Accuracy.

Locating Roots of Equations: Bisection Method, Newton's Method, Secant Method, Muller's Method .

### Unit – II

Interpolation and Numerical Differentiation: Newton's Forward Difference Interpolation, Newton's Backward Difference Interpolation, Lagrange's Interpolation Formula.

Numerical Integration Definite Integral, Trapezoid Rule, Simpson's Rule, Romberg Algorithm, Adaptive Simpson's Scheme, Gaussian Quadrature Formulas.

### Unit – III

Solution of Linear Equations: Gaussian Elimination, Gaussian Elimination with Scaled Partial Pivoting, Iterative Solution of Linear Systems, Gauss-Seidel Iteration Method, Power Methods, Eigenvalues and Eigenvectors.

Ordinary Differential Equations Initial-Value Problem: Analytical vs. Numerical Solution, Taylor Series Methods, Runge-Kutta Methods, Euler method.

### Unit – IV

Smoothing of Data and the Method of Least Squares, Least Squares curve fitting, Straight line and non-linear curve fitting, Cubic Splines, Chebyshev polynomials.

Random Numbers, Estimation of Areas and Volumes by Monte Carlo Techniques.

### Recommended Books:

1. Rajaraman V : Computer Oriented Numerical Methods, 3<sup>rd</sup> Edition; PHI,2005.
2. R.S. Salaria ; Computer Oriented Numerical Methods; 4<sup>th</sup> Edition; Khanna Publ,
3. Balagurusamy E.; Numerical Methods; I Edition; Mc Graw Hill., 2010.
4. Sastri; Introductory methods of Numerical Analysis; 3<sup>rd</sup> edition;PHI, 2001.
5. K.Sankara Rao, Numerical Methods for Scientists and Engineers, Prentice Hall India.
6. Cheney and David Kincaid, *Numerical Methods and Computing*, Brooks/le, 2004
7. Krishnamurthy E. V. , Sen S. K. : Computer Based Numerical Algorithms, East-West Press

## MCA 204: Data Communication and Computer Networks

### Unit – I

Overview of Data Communication and Networks : Basic concept -Computer communication methods, Data Transmission modes, Signals; Modulation - Principles of

*P. S. S. S.*  
20/11/11

Modulation, AM and FM Modulator Circuits, Pulse Code Modulation, signaling and decoding. Digital Band-pass Modulation. Demodulation - detection, signals and Noise, Detection of Binary Signal in Gaussian Noise, Demodulation of shaped Pulses, Digital Band Pass Demodulation.

Network Models : Internet model, OSI seven layer network model, Functions of OSI layers, LAN technologies - protocols and standards, LAN hardware, TCP/IP (Protocols, architecture, layers, services).

### Unit – II

Data transmission : Data Communication Systems, DTE-DCE Interface, Modems, Transmission media(Guided & Unguided), Multiplexing - FDM, WDM, TDM, Digital Subscriber Line (Operation, Layers, Traffic control), FTTC, Error detection and correction; Microwave- Electromagnetic spectrum, Characteristics, use of MIW in communications; PM Microwave Radio Repeaters. Satellite - Artificial Satellite, Geosynchronous Satellites, Orbital classification, Spacing and Frequency allocation, Multiple accessing.

Optical fiber communication : Basic concept of light propagation, Fiber Cables, Light sources, Optical Detectors, Fiber cable losses, wave division multiplexing, fiber distributed data interface, the fiber channel.

### Unit – III

Internet : Internet Architecture, Internet protocol and datagram, Routing protocols, UDP, Internet standard services, DNS.

Networking Technologies, ISDN(Services, Channels, Layers, Broadband ISDN), Cable Modem System, SMDS, Frame relay, fast Ethernet, 100VG-anyLAN and Gigabit Ethernet, FDDI and CDDI, Asynchronous Transfer, SONET(architecture, layers, frame, applications), DWDM Switching and Virtual LAN, Non-ATM Virtual LANs, IEEE 802.1Q VLAN standard, X.25 protocols, ATM (architecture, layers, classes, services).

Networking and Internetworking Devices : Repeaters, Bridges, Routers, Gateways and roles of these devices in communication.

### Unit – IV

Network Performance, Analytical approaches, simulation, traffic monitoring. Network Management - SNMP, RMON and RMONv2, TMN, Directory services and network management.

Issues related to network reliability and security, SSL and VPN, Introduction only to firewalls and Kerberos, Cyber Laws.

Recommended Books :

1. Behrouz A Foruzan, Data Communication and Networking; 3<sup>rd</sup> Edition; Tata McGraw Hill., 2004.
2. Behrouz A Foruzan, TCP/IP Protocol Suite; 2<sup>nd</sup> Edition; Tata McGraw Hill., 2003.
3. Stalling William ;Data and Computer Communication; 8<sup>th</sup> Edition; Pearson, 2009.

*P. Mohan*  
209.11

4. Tannenbaum ; Computer Networks;4<sup>th</sup> edition; PHI, 2008.
5. Wayne Tomasim Electronic Communications Systems, Pearson, Education Asia.
6. M.A. Miller, Data and Network Communications, Thomosn Learning.
7. Gilbert Held, Understanding Data Communication, Techmedia.
8. Fred Harshal, Data Communications Communications Networks, Pearson Education Asia.

## MCA 205: Web Design and Development

### Unit – I

Creating and Maintaining Web Sites: Planning, Navigation and Themes, Site types and Architecture, Elements of a Web page( Pages & Layout, Text, Colour, Images, GUI Forms & GUI Features), steps of creating a site, Web site Planning, Web Site Designing Process, publishing and publicizing site/structuring web site. The Web Medium, Web Searching, Adding Search facility, Optimizing for Search Engines, Site Maps and other Navigation Aids, Site Delivery and Management.

### Unit – II

Introduction of HTML and XHTML : introduction, markup language, editing HTML & XHTML : common tags, headers, text styles, linking, images, formatting text, horizontal rules and more line breaks, unordered lists, nested and ordered lists, basic HTML/XHTML tables : intermediate tables and formatting , forms, more complex forms, internal linking, creating and using image maps.

### Unit – III

Java script - introduction to scripting language, memory concepts, arithmetic, decision making. Java script control structures, Java script functions, program modules in java script, function definitions, duration of identifiers, scope rules, recursion, java script global functions.

Java script arrays: introduction, array-declaring and allocating memory, passing arrays to functions, multiple subscripted arrays. Java script objects- introduction, math, string, data, Boolean and number objects etc.

Introduction to PHP : Advantages of PHP, Functions , Data types, Arrays, SQL, Connecting Databases using ODBC, Files, Forms, Images, Imap objects.

### Unit – IV

Dynamic HTML : CSS : introduction - inline styles, creating style sheets with the style element, conflicting styles, linking external style sheets, positioning elements, backgrounds, element dimensions, text flow and the box model, user style sheets.

Dynamic HTML: object model and collections: introduction, object referencing, collections all and children, dynamic style, dynamic positioning, using the frames collection, navigator object.

*P. John*  
20.9.11

26

Dynamic HTML: event model : introduction, event ON CLICK, event ON LOAD - error handling with ON ERROR, tracking the mouse with event, more DHTML events. Filters and Transitions: Dynamical HTML: Client side scripting with VB script: Introduction - operators- data types and control structures - VB script functions - arrays -string manipulation classes and objects.

### Recommended Books

1. M.L. Young: Complete Reference b: Internet; 2<sup>nd</sup> Edition; Tata Mc Graw Hill, 2006.
2. Thomas A. Powel ; Web Design : C.R.; Second Edition; TMH, 2009.
3. Thomas A. Powel ; HTML & XHTML : C.R.; Fourth Edition; TMH, 2008.
4. Harely Hahn: The Internet, Tata Mc Graw Hill.
5. G. Robertson: Hands on HTML, BPB Publications.
6. D.A. Tauber, B. Kienan: Microsoft From Page 2000, BPB Publications.
7. Joel Sklar: Principles of Web Design, BPB Publications.

## MCA 206: Computer Graphics

### Unit – I

Introduction: Elements of graphics workstation. Video Display Devices. Raster Scan Systems. Random Scan systems. Input devices. Graphics Software Coordinate Representations,

Algorithms: Line drawing algorithms- DDA Algorithm. Bresenham's Line Algorithm. Frame buffers. Midpoint Circle Algorithm. Midpoint Ellipse Algorithm, Sean-line polygon fill algorithm. Inside-Outside tests. Scan- Line fill of curved Boundary Areas. Boundary fill Algorithm. Flood fill Algorithm.

### Unit – II

Graphics Primitives: Primitive Operations, The display file interpreter, Normalized Device Coordinates. Attributes of output primitives: Line attributes, Color and gray scale levels. Color-tables. Gray scale. Area- Fill Attributes, Fill styles. Pattern fill. Soft fill. Character Attributes.

Geometric Transformations: Matrices. Scaling Transformations. Sin and Cos Rotation. Homogeneous Co-ordinates and Translation. Co-ordinate Translations. Rotation about an arbitrary point. Inverse Transformations, Scaling Transformation, Reflection and Shear transformations, Transformations Routines.

### Unit – III

2-D Viewing- The viewing pipeline. Viewing co-ordinate, Reference Frame. Windows to view ports . co-ordinate transformation 2-D Viewing functions. Clipping operations point clipping. Line clipping. Cohen- Sutherland. Line Clipping. Polygon clipping. Sutherland Hodge man clipping.

*P. D. Sharma*  
20/5/11

3-D concepts: Three dimensional Display Methods, Parallel projection. Perspective projection. Visible line and surface identification. Surface rendering. Three Dimensional Object representations. Bezier curves and surfaces. B-Spline curves and surfaces. Visibility, Image and Object Precision Z-buffer algorithm.

#### Unit – IV

Computer Animation : Design of Animation Sequence. General Computer Animation Function – Raster animations, Key Frame system, Morphing, Simulating Accelerations, Motion Specifications, Kinematics and Dynamics.

#### Recommended Books :

1. Hearn D., Baker P.D.; Computer Graphics; 2<sup>nd</sup> edition; Pearson, 2003.
2. Foley J.D.; Van D.A.; Fundamentals of Interactive Computer Graphics; 2<sup>nd</sup> Edition; Addison-Wiley, 2000.
3. Ronger D.F.; Elements of Computer Graphics;
4. Giloi W K ; Interactive Computer Graphics; PHI
5. Mewman W, Sproul R.F.; Principles of Interactive Computer Graphics; Mc Graw Hill.

#### MCA 211: Event Driven Programming (VB) Lab

Practical Lab

Examination : Practical Examination –

Event driven programming: objects, properties, methods, events, Development environmental forms controls, menus dialogs Data types, data structures, control structures, subprograms, intrinsic functions, error handling, file handling. Multiple Form Programming - Information Kiosks

#### MCA 212: Programming in C++ Lab

Practical Lab :

Examination : Practical Examination –

Exercises based on the Theory paper MCA 201.

#### MCA 213: Web authoring Tools Lab

Practical Lab :

Examination : Practical Examination

Exercises based on the Theory paper MCA 205.

*J. When*  
20/8-11

## Course Content in Detail- MCA III Semester (2012-2013)

### Note :

1. Papers I to V are compulsory and paper VI is elective core course. Elective core course will be chosen out of four elective core courses.
2. Internal assessment will be done by teacher concerned on the basis of test papers, regularity in the class and performance of the candidate. Maximum marks in internal assessment of each paper is 100.

### MCA 301 : Programming in Java

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### Unit – I

**Introduction to OOP:** Paradigms of Programming Languages - Basic concepts of Object Oriented Programming , Objects and Classes, Data abstraction and Encapsulation, Inheritance, Polymorphism, Dynamic binding, Message communication; Benefits of OOP; Application of OOPs.

**Introduction to Java :** History, Java features, Java Environment- JDK, API. Types of Java program, Creating and Executing a Java program; Java Tokens: Keywords, Character set, Identifiers, Literals, Separator; Java Virtual Machine (JVM); Command Line Arguments; Comments in Java program.

**Elements:** Constants, Variables, Data types, Scope of variables, Type casting. Operators- Arithmetic, Logical, Bit wise operator, Increment and Decrement, Relational, Assignment, Conditional, Special operator; Expressions, Evaluation of expressions.

#### Unit – II

**Decision making and Branching:** If statement and its types,; switch statement; Decision making and Looping-While loop, do – While, for loop, break, labeled loop, continue Statement.

**Arrays:** One Dimensional Array, Multidimensional Array, Vectors, Wrapper classes; String Array, String Methods, String Buffer Class.

**Class and objects :**Defining a class, Methods, Creating objects, Accessing class members, Constructors, Method overloading, Static members, Nesting of Methods, this keyword, command line input .

**Inheritance:** Defining a subclass, deriving a sub class, Single Inheritance, Multilevel Inheritance, Hierarchical Inheritance, Overriding methods, Final variables and methods, Final

P. Khan

PSD

20/6/12

AD/NOR/12  
30/6/12

Classes, Finalizer methods, Abstract methods and classes, Visibility Control- Public access, Private access, friend, protected. Interfaces- Multiple Inheritance, Defining interface, Extending interface, Implementing Interface, Accessing interface variables.

### Unit – III

**Packages:** Java API Packages – System Packages, Naming Conventions, Creating & Accessing a Packages Finding Packages and CLASSPATH, Adding Class to a Packages, Hiding Classes.

**JAVA Streams :** Data Flow with Java Streams, Input Streams, Output Streams.

**Exception Handling:** Limitations of Error handling, Advantages of Exception Handling, Types of Errors, Basics of Exception Handling, try blocks, throwing an exception, catching an exception, finally statement. declaring and throwing custom Exceptions.

**Multithreading:** Creating Threads, Life of a Thread, Defining & Running Thread, Thread Methods, Thread Priority, Synchronization, Implementing run-able interface, Thread Scheduling.

### Unit – IV

**Collections :** The Collection Framework, The Collection Classes, implementation of List, Set and Map Interface, Accessing a Collection via an Iterator, Object Ordering, The SortedSet and SortedMap Interface, Comparators.

**GUI in Java :** Applet and its uses; Abstract window tool kit, Event Handlers , Event Listeners. AWT Controls and Event Handling – Labels, TextComponent, ActionEvent, Buttons, CheckBoxes, ItemEvent, Choice, Scrollbars, Layout Managers, Input Events, Menus; Introduction to Swing

**Networking:** Java utility for networking, Manipulating URLs, Reading a file on a Web server, Establishing simple Client Server.

## MCA 302 : Software Engineering

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit I

**Systems concepts and definitions:** System's theory, Definition of System, System Characteristics/ features, System Components, System Thinking, Introduction to Software Engineering.

Information Systems - Types of Information Systems, Information Systems Development Methodologies; System Project Planning, Management; Application of Engineering Approach to Computer Software Design and Development.

### Unit II

**Information systems Models and Planning :** Brief Evolution of Software Engineering; Role of Software Engineer; Software Life Cycle ; Types of Software Life Cycle Activities; Typical Documents; Software Life Cycle.

Life Cycle Models -The Linear Sequential Model, Waterfall Model, The Prototyping Model, Incremental Model, Boehm's Spiral Model.

Software requirement and specifications-Object models, Data Flow Model, Behavioral Modeling, Data Dictionary, System Diagram, IEEE standards for Software Requirement specifications (SRS).

Software Planning and Cost Estimation - Project Planning; WBS- Work Break Down Structure; PERT; Software Cost Estimation.

### Unit III

**Software Design Methodologies :** Software Design Methodologies - Phase of the Design Process, Design Concept, Measuring Cohesion, Measuring Coupling, Requirement Traceability. Structured Analysis and Modeling techniques; Process modeling; Logic modeling; Data modeling etc.; User Interface and Database Design; Principles of User Interface Design. Object Oriented design process and evaluation.

Validation and Verification- Verification and validation; Software testing- Strategic approach to software testing , System testing, Component testing, Test case design, Critical system validation.

P. Sharma

P.S.

30/6/12

30/6

5

## Unit IV

**Software Project management, Quality assurance and Maintenance:** Software Project Management- Management Approach, Team Approach, Critical Practices, Capability Maturity Model; Metrics for Process and Project - Metrics for Process, Project, software measurement, software Quality and Integrity. Earned Value Analysis, Error Tracking, Postmortem Review. Software Quality Assurance - Formal Inspection and Technical Review, Software reliability, Statistical Quality assurance; Risk management. Maintenance and Configuration; Documentation of System and Project using structured Approaches. Emerging technologies- Introduction to Security engineering, Service- Oriented s/w engineering, Aspect-Oriented s/w engineering and S/W Reengineering. *CMM Level- 5 ( core concept and advantages )*

### Reference/Text Books

## MCA 303 : Linux and Shell Programming

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit - 1

The Operating System: Linux history, Linux features, Linux distributions, Linux's relationship to Unix, Overview of Linux architecture, Installation, Booting, Login and Shutdown Process, Start up scripts, controlling processes, system processes (an overview), Linux Security, Networking on Linux. User Management: Types of users, The powers of Root, managing users (adding and deleting): using the command line, shell scripts and GUI tools.

P. Khan

*[Signature]*

*[Signature]*  
30/6/12

*[Signature]*  
30/6/12

6

## Unit – II

The Linux File System: Basic Principles, Pathnames, Mounting and Un-mounting File Systems, Different File Types, File Permissions, Disk Usage Limits, Directory Structure, Check and Repair File Systems; Security and file permissions. Shell in Linux: Available shells under Linux, different

shell features, ~~shell commands~~, ~~shell scripts~~: shell variables, ~~environmental variables~~, purpose of shell scripts, ~~writing, storing and executing scripts.~~

## Unit – III

Filters- The grep family, advanced filters-sed and awk. vi editor: General startup of vi editor and its modes, Creating and editing files, features of vi, screen movement, cursor movement, insertion, deletion, searching, submitting operations, yank, put, delete commands, reading & writing files, advanced editing techniques, vim (improved vi).

Shell: meaning and purpose of shell, introduction to types of shell. The command line, standard input and standard output, redirection, pipes, filters special characters for searching files and pathnames.

## Unit – IV

Shell Programming: shell meta character, local and global shell variables - interactive shell scripts — shell script arguments — looping and making choice, for loop, case, while and until, shell functions, eval.

Networking : Networking tools, E-mail, Remote login, FTP, Network and Server setup, LAN, Connection with Internet, Setting-up Routers, Proxy Servers, Print-Server, File server, mail Server, Web server and Database server.

30/6/12

7

## MCA 304 : Application Development Using .NET Frame Work

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit – I

**Introduction to .NET framework :** Managed Code and the CLR, Intermediate Language, Metadata and JIT Compilation, Automatic Memory Management.

**Language Concepts and the CLR:** Visual Studio .NET, Using the .NET Framework.

**The Framework Class Library:**.NET objects - ASP .NET, .NET web services, Windows Forms.

**Elements :** Variables and constants, data types, declaration. Operators, types, precedence. Expressions. Program flow; Decision statements, if ... then, if..then..else, select..case, Loop statements, while..end while, do..loop, for..next, for..each..next.

**Types:** Value data types, Structures, Enumerations. Reference data types, Single-dimensional, Multi-dimensional arrays, jagged arrays and dynamic arrays.

### Unit – II

**Windows programming:** Creating windows Forms, windows controls, Button, Check box, Combo box, Label, List box, Radio Button, Text box. Events, Click, close, Deactivate, Load, Mousemove, Mousedown, MouseUp.

**Menus and Dialog Boxes:** Creating menus, menu items, context menu, Using dialog boxes, showDialog() method.

**ADO.NET:** Architecture of ADO.NET, ADO.NET providers, Connection, Command, Data Adapter, Dataset. Connecting to Data Source, Accessing Data with Data set and Data Reader, Create an ADO.NET application, Using Stored Procedures.

### Unit – III

**ASP.NET Features:** Applications of States and Structure; Change the Home Directory in IIS - Add a Virtual Directory in IIS- Set a Default Document for IIS - Change Log File Properties for IIS - Stop, Start, or Pause a Web Site.

P. Sharma

P.S.

30/6/12

A. Sharma  
30/6/12

8

**Creating Web Controls:** Web Controls, HTML Controls, Using Intrinsic Controls, Using Input Validation Controls, Selecting Controls for Applications, Data Controls and Adding web controls to a Page.

**Creating Web Forms:** Server Controls, Types of Server Controls, Adding ASP.NET Code to a Page.

#### Unit – IV

**Overview of XML :**XML Serialization in the .NET Framework -SOAP Fundamentals-Using SOAP with the .NET Framework.

**Web Services and WCF :** Web Services protocol and standards – WSDL Documents - Overview of UDDI - Calling a Web Service from a Browser - Calling a Web Service by Using a Proxy - Creating a simple web service - Creating and Calling a Web Service by Using Visual Studio .NET. Architecture of WCF, WCF Client.

### MCA 305 : Data Warehousing & Data Mining

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

Note : 1. Candidate has to attempt five questions in all. All questions carry equal marks.

2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### UNIT I

**Introduction to Data Warehousing :**Introduction, Data Warehouse, importance and functions, Multidimensional Data Model, Data Marting and it's usage, Cost of data marting, Metadata, Data Warehouse Architecture, Building a Data warehouse , Implementation, Further Development. Planning and Project Management of Data Warehouse.

P. Whor

P. S. S.

30/6/12

30/6/12

9

## UNIT II

**Data Mining :** Data Warehousing to Data Mining, Evolution Analysis, Classification of Data Mining Systems, Architecture of data mining system, Major Issues in Data Mining. Data Preprocessing : Needs Preprocessing the Data, Data Cleaning, Data Integration and Transformation, Data Reduction, Discretization and Concept Hierarchy Generation; Analysis of Attributes Relevance, Discriminating between Different Classes. Data Warehouse and OLAP Technology for Data Mining.

## UNIT III

**Association Rules :** Association Rule Mining, Single-Dimensional Boolean Association Rules from Transactional Databases, Multi-Level Association Rules from Transaction Databases. Issues regarding classification & prediction, Different Classification Methods, Prediction.

## UNIT IV

**Clustering and Applications of Data Mining :** Cluster Analysis, Types of Data, Categorization of Major Clustering Methods, Kmeans, Partitioning Methods, Hierarchical Methods, Density-Based Methods, GridBased Methods, Model-Based Clustering Methods, Clustering High Dimensional Data, Constraint Based Cluster Analysis, Outlier Analysis, Data Mining Applications.

**Future Trends :** Multidimensional Analysis and Descriptive Mining of Complex Data Objects, Spatial Databases, Multimedia Databases, Time Series and Sequence Data, Text Databases, Web Mining, Spatial Mining, Temporal Mining, Applications and Trends in Data Mining.

### Text/Reference Books :

## MCA 306 A01: Advanced Computer Architecture

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit – I

**Instruction level parallelism (ILP)**- over coming data hazards- reducing branch costs –high performance instruction delivery- hardware based speculation- limitation of ILP, IA 64 and Itanium processors. ILP software approach- compiler techniques- static branch protection - VLIW approach - H.W support for more ILP at compile time- H.W verses S.W Solutions.

### Unit – II

**Multiprocessors and thread level parallelism** - Symmetric and distributed shared memory architectures-distributed shared memory- Performance issues -Synchronization – Models of memory consistency- Introduction to Multithreading.

### Unit – III

**Storage systems**- Cache performance – Reducing cache miss penalty and miss rate – Reducing hit time –Main memory and performance – Memory technology. Types of storage devices – Buses – RAID – Reliability, availability and dependability – I/O performance measures – Designing an I/O system.

### Unit – IV

**Software and hardware multithreading** – SMT and CMP architectures – Design issues –Case studies – Intel Multi-core architecture – SUN CMP architecture - heterogeneous multi-core processors – case study: IBM Cell Processor.

### Recommended reference/text books:

1. Computer Architecture A quantitative approach 3rd edition John L. Hennessy & David A. Patterson Morgan Kufmann (An Imprint of Elsevier)

20/6/12

A. H. W.

### MCA 306A02: Grammar based Processing

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### UNIT-1

**N-grams Models of Syntax:** Counting Words in Corpora Simple (Un smoothed) Ngrams, Smoothing , Add-One Discounting, Witten-Bell Discounting, Good- Turing Discounting, Backoff, Combining Backoff with Discounting, Deleted Interpolation, Ngrams for Spelling and Pronunciation, Real Word Spelling Errors, N-grams for Pronunciation Modeling, Entropy, Cross Entropy for Comparing Models.

**HMMs and Speech Recognition:** Introduction to Speech Recognition, Overview of a Speech Recognition Architecture, Overview of Hidden Markov Models, The Viterbi Algorithms, Advanced Methods of Decoding, A \* Decoding, Acoustic Processing of Speech, Sound Waves, How to Interpret a Waveform, Spectra, Feature Extraction, Computing Acoustic Probabilities, Training a Recognizer.

#### UNIT-II

**Word Classes and Part-of-Speech Tagging:** English Word Classes, Tagsets for English, Part of Speech Tagging, Rule-Based Part of Speech Tagging, Stochastic Part of Speech Tagging, The Actual Algorithm for HMM Tagging, Transformation-Based Tagging, How TBL Rules are Applied, How TBL Rules-are Learned, Multiple Tags and Multiple-Words, Unknown Words, Class-based N-grams

**Context Free Grammars for English Syntax:** Constituency, Context-Free Rules and Trees, Sentence-Level Constructions, The Noun Phrase, Before the Head Noun.After the Noun, Coordination, Conjunction, Agreement, The Verb Phrase and Subcategorization, Spoken Language Syntax, Disfluencies, Prosody, Grammar Equivalence and Normal Form, Finite-State Grammars and Context-Free Grammars, Grammars and Human Processing.

#### UNIT-III

**Parsing with Context Free Grammars:** Parsing as Search, Top-down Parsing, BottomUp Parsing, Comparing Top-down and Bottom-up parsing, A Basic Top-Down Parser, Adding Bottom-up Filtering, Problems with the Simple Top-Down Parser, Left-recursion Ambiguity, Repeated Parsing of Subtrees, The Earley Algorithm, Dynamic Programming and its Relation to Chart Parsing and Viterbi, Finite-State Parsing Methods.

f. Whar

~~PSD~~  
20/6/12

~~PSD~~  
20/6/12

Features and Unification: Feature Structures, Unification of Feature Structures, Feature Structures in the Grammar, Agreement, Head Features, Subcategorization, Long Distance Dependencies, Implementing Unification, Unification Data Structures, The Unification Algorithm, Unification Parsing, Integrating Unification into an Earley Parser, Types and Inheritance, Extensions to Typing, Other Extensions to Unification .

### UNIT-1V

Lexicalized and Probabilistic Parsing: Probabilistic Context-Free Grammars, Probabilistic CYK Parsing of PCFGs, Learning PCFG Probabilities, Problems with PCFGs, Probabilistic Lexicalized CFGs, Dependency Grammars, Human Parsing.

Language and Complexity: The Chomsky Hierarchy, How to tell if a language isn't regular, Pumping Lemma, Are English and other Natural Languages Regular? Is Natural Language Context-Free, Complexity and Human Processing

#### Text/Reference:

### MCA 306 A03 : THEORY OF COMPUTATION

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### UNIT-1

Introduction of automata, computability, and complexity; mathematical notations and terminology; finding proofs and types of proofs.

Automata and Languages: Regular languages, finite automata, formal definition of a finite automaton, formal definition of computation, designing finite automata.

P. Sharma

PSD 30/6/12

A. Sharma 30/6/12

13

### UNIT-II

Non-deterministic finite automata: Equivalence of NFAs and DFAs, closure under the regular operations, Regular Expressions: formal definition of a regular expression, equivalence with finite automata, nonregular languages: pumping lemma for regular languages.

### UNIT-III

Push down Automata and Context free languages: Context free grammars, designing context free grammar, ambiguity in CFG and its removal, Chomsky normal form push down automata: formal definition, graphical notations, Languages accepted by PDA, Equivalence of PDA and CFG, Non-context free languages.

### UNIT-IV

Turing Machines and Computability: Formal definition of turing machines with examples, graphical notations, variants of turing machines, church-turing thesis, Hilbert's problem.

Decidability, undecidability and reducibility: Decidable languages; decidable problems concerning regular languages and context free languages, the halting problem, undecidable problems, mapping reducibility, decidability of logical theories, turing reducibility.

### MCA 406 A04 : DIGITAL IMAGE PROCESSING

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### UNIT-1

Introduction: Origins of digital image processing, application area, components of an image processing system.

P. Ullman

P. S. S.

30/6/12

30/6/12

Digital Image Fundamentals: Elements of visual perception, light and the electromagnetic spectrum, image sensing and acquisition, image sampling and quantization, relationships between pixels.

### UNIT-II

Image Enhancement in the Spatial Domain: Background, gray level transformations, histogram processing, enhancement using arithmetic/logic operations, spatial filtering, smoothing spatial filters, sharpening spatial filters, combining spatial enhancement methods.

Image Enhancement in the Frequency domain: Introduction to the Fourier transform and the frequency domain, smoothing frequency-domain filters, sharpening frequency domain filters, homomorphic filtering, implementation.

### UNIT-III

Image restoration: Model of the image degradation/restoration process, noise models, restoration in the presence of noise only—spatial filtering, periodic noise reduction by frequency domain filtering, linear, position-invariant degradations, estimating the degradation function, inverse filtering, minimum mean square error (Wiener) filtering, constrained least squares filtering.

### UNIT-IV

Color image processing: Color fundamentals, and models, color image processing, transformations, smoothing and sharpening, color segmentation.

Image compression: Image compression models, error-free compression, lossy compression, image compression standards.

Edge detection – Thresholding; Region Based segmentation; Boundary representation: chain codes, Polygonal approximation, Boundary segments, boundary descriptors.

## Course Content in Detail- MCA IV Semester (2012-2013)

- Note : 1. Papers I to V are compulsory and paper VI is elective core course. Elective core course will be chosen out of four Elective Core Courses.
2. Internal assessment will be done by teacher concerned on the basis of test papers, regularity in the class and performance of the candidate. Maximum marks in internal assessment of each paper is 100.

### MCA 401: COMPUTER BASED OPTIMIZATION TECHNIQUES

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note : 1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### UNIT- I

**Linear Programming Problems (LPP):** Formulation of an LPP, Solution of an LPP using graphic method and simplex method, Slack, Surplus & Artificial variables, Two-phase and big-M method.

**Special cases in LPP:** Alternate optimum solution, An unbounded solution, Infeasible Solution, Duality in LPP, Revised Simplex method.

#### UNIT- II

**Transportation Problems:** Definition, methods for finding initial basic feasible solutions - North West corner rule, least cost cell entry method, Vogel's approximation method, methods for finding optimal solution - MODI Method,.

**Assignment problems:** Definition & concept, solution of an assignment problem for optimum solution - Hungarian Method.

**Sequencing :** Job - problems for processing N Jobs on 2 machines, processing N jobs on 3 machines, processing N jobs on processing M machines, Processing 2 jobs on M machines (Graphic Method).

#### UNIT- III

**Inventory Models:** What is Inventory? Types of Inventories, Inventory Decisions, Cost involved in inventory problems, Controlled & Uncontrolled variables, deterministic inventory control system, concept of an average inventories, concept of economic order quantity (EOQ). (In short Model-I, II and Model III).

P. Madhu

P. S. D.  
30/11/12

P. S. D.  
30/11/12

17

**Replacement Models:** Introduction - The replacement problem, replacement of items that deteriorate (With money value), replacement of items that fail completely (Mortality theorem).

#### UNIT - IV

**Project Management by PERT & CPM:** Introduction - Historical Development of CPM/PERT, Application of PERT - CPM techniques, network diagram representation, rules for drawing network, time estimation & critical path in network analysis.

**Queuing theory:** Introduction queuing system, queuing problem, transient & steady states, traffic intensity, distribution of queuing system (Birth & Death Process), Queuing Models - I, II & III.

#### RECOMMENDED BOOKS:

5. Sharma S.D. Operations Research, Kedar Nat R. & Com., Meerut, 2003.
6. Kapoor V.K.: Operations Research, Sultan Chand & Sons, 1999.
7. P. K Gupta & D.S Hira : Operation Research, S. Chand & Company Ltd, New Delhi 2000

### **MCA 402 Advanced Java Programming & Technology**

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100.

Note : 1. Candidate has to attempt five questions in all. All questions carry equal marks.

2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.

3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### **Unit I**

**Introduction to Advance Java Application:** Networking with Java - Networking basics, Socket, port, Proxy servers, Internet addressing and URL, java.net –networking classes and interfaces, Implementing TCP/IP based Server and Client. Classes to be covered Socket, Server-Socket, IP Address, URL connections.

P. Sharma

P. Sharma  
30/6/2012

30/6/12

A. Sharma  
30/6

**Java Applets:** Introduction, Applet Architecture ; The java.applet.Applet Class; The Five Stages of an Applet's Life Cycle, Methods for Adding UI Components, Methods for Drawing and Event Handling.

**Unit -II**

**Applications in distributed environment:** Remote method Invocation – activation models – RMI custom sockets – Object Serialization – RMI – IIOP implementation – CORBA – IDL technology – Naming Services – CORBA programming Models - JAR file creation.

**Database Application :** The JDBC Connectivity Model, Database Programming, Connecting to the Database Types of JDBC Drivers, Writing JDBC applications using select, insert, delete, update; Types of Statement objects (Statement, Prepared-Statement and Callable-Statement); ResultSet, ResultsetMetaData; Inserting and updating records, Connection Pooling.

**Unit III**

**Introduction to J2EE :** J2EE Overview, Need of J2EE; J2EE Architecture, J2EE APIs, J2EE Containers. Overview of J2ME and its Features- Building MIDlets, User Interface, Event Handling, Screens, List and Forms. **J2ME – Overview,** MIDlets, Create User Interface, Event Handling with Command Tickers, Screen, Text Box, List and Forms.

**Servlet :**Web Application Basics, Architecture and challenges of Web Application, Servlet life cycle, Developing and Deploying Servlets ,Exploring Deployment Descriptor (web.xml), Handling Request and Response, Initializing a Servlet, Accessing Database, Servlet Chaining, Session Tracking & Management, Dealing with cookies, Transferring Request, Accessing Web Context, Passing INIT and CONTEXT Parameter, Sharing information using scope object, Controlling concurrent access, User Authentication, Filtering Request and Response- Programming Filter, Filter Mapping, Servlet Listeners.

**Java Server Pages Technology:** Basic JSP Architecture , Life Cycle of JSP (Translation, Compilation), JSP Tags and Expressions , Role of JSP in MVC-2, JSP with Database, JSP Implicit Objects, Tag Libraries, JSP Expression Language (EL), Using Custom Tag. JSP Capabilities - Exception Handling, Session Management, Directives, JSP with Java Bean.

**Unit -IV**

**Java Beans :** Introduction to Java Bean, Rules for writing a Simple Bean, Java Naming Directory Interface API ,Java Naming Directory Interface concept.

**Enterprise JAVA Beans :** Enterprise Bean overview, Types of enterprise beans, Advantages of enterprise beans, The Life Cycles of Enterprise Beans, Working with Session Beans, Statefull vs. Stateless Session Beans, Working with Entity Beans, Message Driven Beans.

**Introduction to Struts :** (A Web Application Framework) – Struts-config.xml; Understanding MVC architecture; ActionServlet, ActionForm, ActionMapping, Action classes.

### MCA 403 : Advanced Database systems

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### Unit I

~~Overview of relational algebra and Structured Query Language (SQL)~~

**Transaction Management and Concurrency Control :** Transaction -Evaluating Transaction Results, Transaction Properties, Transaction Management with SQL, The Transaction Log ; Concurrency Controls; Concurrency Control with Locking Methods; Concurrency Control with Time Stamping Methods - Wait/Die and Wound/Wait Schemes , Concurrency Control with Optimistic Methods, Database Recovery Management.

**Parallel database Systems:** Concepts, Architecture of Parallel Databases, Inter-Query and Intra-Query Parallelism, Inter-Operational and Intra-Operational Parallelism, Design of Parallel Database Systems.

#### Unit II

**Introduction to Object-Based Databases :** Object Oriented Database concepts, Advantages, OODBMS Features, Groups and Languages; Object Relational Database concepts and Design.

P. Sharma

P. Sharma  
30/6/12

P. Sharma  
30/6/12

**Database Performance Tuning and Query Optimization** : Database Performance and Tuning; Statistics ; Query Processing; Indexes and Query Optimization ; Optimizer Choices; SQL Performance Tuning.

**PL/SQL** : Concepts of Embedded SQL, Dynamic SQL, SQLJ. PL/SQL Concepts, Elements, Structures, Cursors, Triggers, Database Stored Procedures and SQL/PSM.

~~XML - XML Hierarchical Data Model, XML Document and Databases, XML Queries.~~

**Unit III**

**Distributed Database Management Systems** : Evolution, Characteristics, DDBMS Components; Levels of Data and Process Distribution(i.e. SPSD, MPSD, MPMD); Distributed Database Transparency Features; DDBMS Design- Data Fragmentation, Data Replication, Data Allocation; Client/Server vs. .DDBMS.

**Introductions to Data Warehousing and Data Mining** : Data Warehouse – Decision Support Architectural Styles; Twelve Rules that Define a Data Warehouse; Data Mining Concepts. OLAP – Concepts, Architecture relation, OLAP V/s OLTP, Star V/s Clouding Architecture.

**Unit IV**

**Database Connectivity and Web Technologies** : Database Connectivity - Native SQL Connectivity, ODBC, DAO, and RDO, OLE-DB, ADO.NET, Java Database Connectivity (JDBC); Internet Databases - Web-to-Database Middleware: Server-Side Extensions, Web Server Interfaces, The Web Browser, Client-Side Extensions, Web Application Servers.

**Database Administration and Security** : The Need for and Role of a Database in an Organization; The Evolution of the Database Administration Function; The Database Environment's Human Component- The DBA's Managerial Role, The DBA's Technical Role; Security - Security Policies, Security Vulnerabilities, Database Security; Database Administration Tools - The Data Dictionary; Developing a Data Administration Strategy.

## MCA 404 : MANAGEMENT INFORMATION SYSTEM

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note : 1. Candidate has to attempt five questions in all. All questions carry equal marks.  
2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.  
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit I

**Introduction to MIS:** Meaning and Role of MIS, Definition of MIS, System Approach to MIS. MIS Organization within a company. Concept of Balanced MIS, effectiveness and efficiency criteria.

**MIS Planning:** MIS structure and components, MIS features, Problem and Derivation of MIS plans, Prioration and developmental strategies.

### Unit II

**Conceptual Design of MIS :** Definition of problem, System objectives and system constraints. Analysis of information source, alternative system design and selection optimal system.

**Detailed System Design and Implementation:** Application of basic design concepts to MIS, Involvement of end- user and role of MIS department and System Analyst, Role of Top Management during design and implementation.

### Unit III

**System Evaluation :** System evaluation review and update. Management and control of MIS function. Advanced MIS concept, Pitfalls in MIS development.

**Decision Making System :** Decision Making Definition and Concept, Phases of Decision Making Process, Modeling Process, Static and Dynamic Models, Sensitive Analysis, Heuristic Programming, Simulation.

### Unit IV

**Decision Support System :** DSS Definition, Characteristics, Application, Case Study.  
**Expert System :** Concept, Structure, Application and Case Study.

**Application of MIS(see note at end):** MIS for Accounting and Finance Function, MIS for Personnel Systems, For Marketing Systems, Inventory system, DSS, EMS, Decision Support System, Enterprise Management Systems.

P. Wham

PJL  
30/6/12

M  
30/6/12

M  
30/6/12

Note: A Standard layout is to be adopted for all MIS:

- (1) Key Information Needs.
- (2) Transaction Processing and Management Control.
- (3) Reports Design and Data Collection Methods routing, frequency, Input, Output and Control Reports.
- (4) Computer System Design- Master and Transaction files, Checks & Control Reports.

- 7. Efrain Turban; Decision Support & Intelligence System; 8<sup>th</sup> Edition; Pearson Education.

MCA 405 : E-Commerce

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
- 1. Candidate has to attempt five questions in all. All questions carry equal marks.
  - 2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  - 3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

Unit I

Basic Concepts : Introduction, Definition, Objectives, Advantages and disadvantages, Forces driving E-Commerce, Traditional commerce Vs. E-Commerce, E-Commerce opportunities for industries, Growth of E-Commerce.

Electronic Data Interchange : Concepts of EDI and Limitation, Application of EDI, Disadvantages of EDI, EDI model; EDI Implementation, MIME and Value-Added Network, Internet-based EDI.

Unit II

E-Commerce Models: B2C,B2B, C2C, C2B, other models – Brokerage Model, Aggregator Model, Info-mediary Model, Community Model and value chain Model, Advertise Model.

Electronic Payment Systems: Special features required in payment systems, Types of E-payment systems, E-Cash, E-cheque, credit card, Smart Card, Electronic Purses, e-Billing, E- e-Micropayments , Point Of Sales System(POS) - Meaning, Uses, Structure.

P. Khan

PSA  
30/6/2012

30/6

## Unit III

**Customer Relationship Management & Technologies :** E-Transition Challenges in Indian Corporates, E-Commerce and WWW, e- Marketing, E-Customer Relationship Management, E-CRM Problems and Solutions, CRM Capabilities and Customer life cycle, E-Supply Chain Management. E-Strategy- Planning the E-Commerce Project, E-Commerce Strategy and Knowledge Management, E-Business Strategy and Data Warehousing & Mining. ERP for E-Commerce. Customer-effective Web Design – Requirement, Strategy and Model.

## Unit IV

**m-Commerce:** Overview of mobile-Commerce, Mobile Delivery Technology & Switching Methods, Attributes of m-Commerce, Drivers of m-Commerce, m-Commerce Security issues, Mobile ATM(ICICI Bank Case Study). Applications of m-Commerce: Mobile Financial Applications, m-wallet, Mobile Shopping, Advertising And Content provision.

### Case-Study

**Security Issues in E-Commerce:** Security risk of E-Commerce, Types of threats, Security tools and risk management approach. Cyber laws, Business Ethics, IT Acts.

### Suggested Books:

## MCA 406 B01 : Network Management

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit – I

**Basic Concepts :** Data Communications and Network Management Overview, Basic Foundations, Standards, Models, and Language of Network Management.

P. Sharma

P. Sharma  
30/6/12

30/6/12

P. Sharma  
30/6/12

**Network Management Technologies :** SGMP, CMIP, SNMP Network Implementation and Management Strategies, Review of Computer Network Technology, SNMP, Broadband, and TMN Management, Performance Management, Fault Management, Configuration Management, Security Managements, Accounting Managements. Network Management Configuration: Centralized Configuration, Distributed Configuration. Selected Management Strategy. *SONET - introduction.*

**Unit - II**

**Management Information Base (MIB):** Structure of Management Information, NMS Presentation of the SMI, NMS Meter-ware Network View. Remote Monitoring (RMON), RMON Group. Desktop Management: Desktop Management Interface(DMI), DMI Architecture, DMI Browser, DMI/SNMP Mapping, Desktop SNMP Extension Agents. Setting up LAN Access, SNMP Configuration.

**SNMP Technology :** SNMPv1 Network Management - Organization and Information Models. SNMPv1 Network Management- Communication and Functional Models. SNMPv2, SNMPv3, RMON SNMP Management.

**Unit - III**

**Delivery and Routing of IP Packets:** Routing Methods, Routing Module, Classless, Interior and Exterior Routing, Routing information protocol(RIP), Open shortest path first protocol (OSPF), BGP, GGP. Private Networks. Virtual Private Network (VPN), Network Address Translation.

**Internet Control Message Protocols (ICMP):** ICMP Package, Messaging, Transmission Operations and Protocols; Services.

**Unit - IV**

**Management Tools, Systems, and Applications:** Network Management Tools and Systems Network Management Applications, Web-Based Management .

**Security Management :** Secure Network Management and Network Security Management, Organizational Realities. Protocol Capabilities. Tool Capabilities. Secure Management Design Options. Network Security Management, Firewalls, Trusted systems, IT act and cyber laws.

## MCA 406 B02 : Artificial Intelligence

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

### Unit : I

**Basic Concept :** Foundations of AI , scope, problems, and approaches of AI. Intelligent agents, reactive, deliberative, goal-driven, utility-driven, and learning agents ,Artificial Intelligence programming techniques

**Problem-solving through Search:** forward and backward, state-space, blind, heuristic, problem-reduction, A, A\*, AO\*, minimax, constraint propagation, neural, stochastic, and evolutionary search algorithms, sample applications.

### Unit : II

**Knowledge Representation and Reasoning:** Ontologies, foundations of knowledge representation and reasoning, representing and reasoning about objects, relations, events, actions, time, and space; predicate logic, situation calculus, description logics, reasoning with defaults, reasoning about knowledge, sample applications.

**Planning:** planning as search, partial order planning, construction and use of planning graphs

### Unit : III

**Representing and Reasoning with Uncertain Knowledge:** probability, connection to logic, independence, Bayes rule, bayesian networks, probabilistic inference, sample applications.

**Decision-Making:** basics of utility theory, decision theory, sequential decision problems, elementary game theory, sample applications. Expert System- Need, Componets, Categories, Stages of Expert System Development.

### Unit : IV

**Machine Learning and Knowledge Acquisition:** learning from memorization, examples, explanation, and exploration. learning nearest neighbor, naive Bayes, and decision tree classifiers, Q-learning for learning action policies, applications.

**Brief Survey of selected additional topics:** perception, communication, interaction, and action; multi-agent systems. Sample Applications of AI, student project presentations

**MCA 406 B03 : Compiler Design**

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note : 1. Candidate has to attempt five questions in all. All questions carry equal marks.  
 2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.  
 3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

**Unit – I**

**Overview of Compilation** : Phases of Compilation – Lexical Analysis, Regular Grammar and regular expression for common programming language features, pass and Phases of translation, interpretation, bootstrapping, data structures in compilation – LEX lexical analyzer generator.

**Unit – II**

**Parsing** : Context free grammars, Top down parsing – Backtracking, LL (1), recursive descent parsing, Predictive parsing, Pre-processing steps required for predictive parsing. Shift Reduce parsing, LR and LALR parsing, Error recovery in parsing , handling ambiguous grammar, YACC – automatic parser generator.

**Unit – III**

**Symbol Tables** : Symbol table format, organization for block structures languages, hashing, tree structures representation of scope information. Block structures and non block structure storage allocation: static, Runtime stack and heap storage allocation, storage allocation for arrays, strings and records

**Unit – IV**

**Code optimization & Generation** : Consideration for Optimization, Scope of Optimization, local optimization, loop optimization, frequency reduction, folding, DAG representation. Flow graph, data flow equation, global optimization, redundant sub expression elimination, Induction variable elements, Live variable analysis, Copy propagation. Object code forms, machine dependent code optimization, register allocation and assignment generic code generation algorithms, DAG for register allocation.

**Recommended reference/text books:**

1. Principles of compiler design -A.V. Aho . J.D.Ullman; Pearson Education.
2. Holub, Compiler Design in C, PHI.
3. Engineering a Compiler-Cooper & Linda, Elsevier.

**MCA 406 B04 : Multimedia Systems**

Theory & Tutorial : 4 hours per week ( 4 credits)

Examination : Theory Paper - 3 Hours ; Max. Marks- 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question no. 1 covering whole syllabus will consist of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

**Unit – I**

**Multimedia System Basics :** Multimedia System Elements; Multimedia System Architecture; Multimedia technologies; Video/Audio Fundamentals, Multimedia Authoring and Tools Graphics and Image Data Representations, Color in Image and Video, Fundamental Concepts in Video, Basics of Digital Audio. Multimedia I/O Technologies- Key Technology Issues, Standard Multimedia Devices, Multimedia Output Devices.

**Unit – II**

**Compression and Decompression :** Type of Compressions, Binary Image Compression Schemes, Image Compression, Video Image Compression, Audio Compression, Lossless Compression Algorithms, Lossy Compression Algorithms, Image Compression Standards, Basic Video Compression Techniques, MPEG Video Coding I - MPEG-1 and 2, MPEG Video Coding II - MPEG-4, DVI and Beyond.

**Unit – III**

**Audio Compression :** Audio Compression Techniques, MIDI, MPEG Audio Compression, Speech Reorganization and Generation, Video Images and Animation.

File Formats and Standards – Rich Text, TIFF, RIFF, MIDI, JPEG, AVI, MPEG, TWAIN formats and its uses.

**Multimedia Communication :** Multimedia Communication and Retrieval, Multimedia Network Fundamentals, Multimedia Protocols for the Internet, Multimedia Network Communications and Applications, Multimedia Networking Services, Multimedia OS design and Implementation.

**Unit – IV**

**Trends in Multimedia –** Multimedia in Wireless Networks; Content-Based Retrieval in Digital Libraries; Multimedia Storage Systems, User Interface; Multimedia Synchronization, Multimedia Presentation and Web Technologies(Documents, Hypertext, MHEG), Multimedia Databases, P2P Multimedia Systems.

## Course Contents in Detail – MCA V Semester 2013

**Note:**

1. Paper I to IV are compulsory core courses and paper V and VI are elective core courses. Elective core course will be chosen out of four elective core courses.
2. Internal Assessment will be done by teacher concerned on the basis of test papers, regularity in the class and performance of the candidate. Maximum marks in Internal Assessment of each paper is 100.

### MCA 501: Information Security And Cryptography

Theory & Tutorial: 4 hours per week ( 4 Credits)

Examination: Theory Paper – 3 hours; Max. Marks – 100

- Note:**
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### Unit I

Introduction to Computer Security and Cryptography, Security Attacks, Security Services and Mechanism.

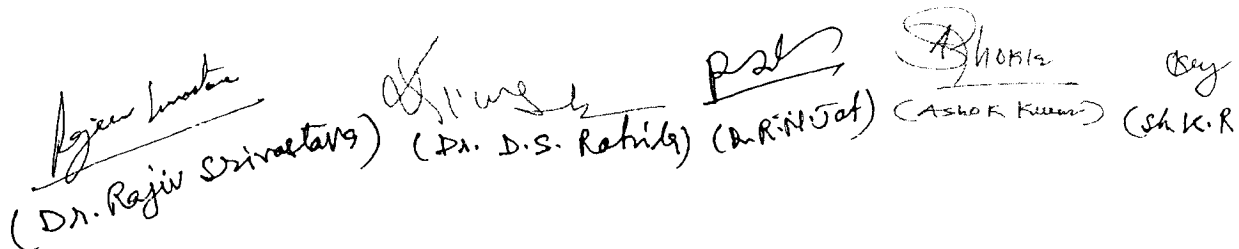

**Classical Encryption Techniques :** Classical Techniques, Conventional Encryption Model, Classical Encryption Techniques.

**Modern Techniques:** Simplified DES, Block Ciphers Principles, DES Standards, DES Strength, Differential & Linear Cryptanalysis, Block Cipher Design Principles, Block cipher Modes of Operation.

#### Unit II

**Conventional Encryption Algorithms:** Triples DES, International Data Encryption Algorithm, RC5, RC2 placement & Encryption Function, Key Distribution, Random Number generation, Placement of Encryption Function.

**Public Key Encryption:** Public Key Cryptography: Principle of public key Cryptosystems, RSA algorithm, Key Management, Fermat's Theorem & Euler's Theorem, The Chinese remainder theorem.

  
 (Dr. Rajiv Srivastava) (Dr. D.S. Rahib) (Anil Jot) (Ashok Kumar) (Sh. K.R)

Unit III

**Hash Functions:** Message Authentication & Hash Function: Authentication Requirements, Authentication Function, Message Authentication Codes, Hash Function. Birthday Attacks, Security of Hash Function & MAC's, MD5 Message Digest algorithm, Secure Hash Algorithm(SHA).

**Digital Signatures:** Digital Signature, Authentication Protocol, Digital Signature Standard(DSS), proof of digital signature algorithm.

Unit IV

**Network and System Security:** Authentication Application- Kerberos x.509, Dictionary Authentication Services, Electronic Mail Security, Pretty Good Privacy (PGP), S/mime. Security: Architecture, Authentication Header, Encapsulation security payloads, combining security association, Key Management. **Web Security:** Secure socket layer & Transport layer security, Secure electronic transaction (SET). System Security: Intruders, viruses, firewall Design principle, Trusted Systems.

Reference Books:

1. William Stallings; Cryptography and Network Security, Fifth Edn, Pearson.;
2. Atul Kahate; Cryptography and network Security; Tata McgrawHill.
3. V.K. Pachghare; Cryptography and Information Security; PHI.
4. Matt Bishop, Sathyanarayana; Introduction to Computer Security; Pearson.

MCA 502: Wireless Technology

Theory & Tutorial: 4 hours per week ( 4 Credits)

Examination: Theory Paper – 3 hours; Max. Marks – 100

- Note:
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

Unit I

*Deven Kishore*

*H. Singh*

*PSD*

*Ashok Kumar*  
(Ashok Kumar)

*Deven*

**Introduction of wireless communication:** Overview, Frequencies for Radio transmission, Evolution of Cellular System, Cellular System Architecture & Operation, Performance criteria, Multiple access schemes for wireless communication- TDMA, FDMA, CDMA, CSMA, SDMA.

**Unit II**

**Wireless Network Planning And Operation:** Frequencies Management, Channel assignments, Frequency reuse, System Capacity & its improvement, Handoffs & its types, roaming, Co-Channel & Adjacent Channel Interference.

**Digital Cellular Networks:** GSM Architecture & Interfaces, Signal Processing in GSM, Frame Structure of GSM, Channels used in GSM.

**Unit III**

**Wireless LAN Technology:** Overview, WLAN Technologies, Infrared LANs, Spread Spectrum LANs Narrowband, Microwave LANs IEEE 802.11- Architecture, Protocols, MAC layer, MAC frame, MAC Management.

**Bluetooth :** Overview, Architecture of Bluetooth Systems, Radio Specifications, Base Band Specification, Link Manager specification, Logical Link Control & Adaptation Protocol.

**Unit IV**

**Mobile Data Networks:** Introduction, Data oriented CDPD Networks, GPRS.

**Wireless Access Protocol:** WAP Architecture, Wireless Datagram, Wireless Transport Layer Security, Wireless Transaction, Wireless Session, Wireless Application Environment, WML.

**Text/ Reference Books:**

1. Mobile communication Engg- Lee W.C.Y
2. Wireless Communication, Principles & Practice-T.S.Rappaport
3. Mobile Communication, Pearson Education- Schiller
4. Wireless Communication & Networking-William Stalling
5. Mobile communication -Rampantly
6. Wireless digital communication", PHI, KamiloFeher
7. Principles of Wireless Networks-Kaveshpahlavan&P.Krishna Murthy

### MCA 503: Analysis and Design of Algorithms

Theory & Tutorial: 4 hours per week (4 Credits)

Examination: Theory Paper – 3 hours; Max. Marks – 100

- Note:
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### Unit I

**Introduction:** Algorithm Definition and Specifications, Design of Algorithms and Complexity of Algorithms, Asymptotic Notations, Growth function, Recurrences and Performance Analysis.

**Divide and Conquer Algorithms:** General method, Binary search, Merge sort, Quick Sort.

#### Unit II

**Greedy Methods:** General method, Knapsack Problem, Activity Selection problem, A task scheduling problem ,Minimum Cost Spanning Tree, Single Source Shortest Path.

**Dynamic Programming:** General method, Multistage graphs, All Pair Shortest Path, Optimal Binary Search trees, 0/1 Knapsack, Travel Salesman Problem, Flow Shop Scheduling.

#### Unit III

**Advanced data structure:** B-trees, Fibonacci Heaps, Data Structure for Disjoint Sets.

**Backtracking:** General method, 8 Queens Problem, Sum of Subsets, Graph Colouring, Hamiltonian Cycles, Knapsack Problem.

#### Unit IV

**Branch and Bound:** 0/1 Knapsack Problem, Travel Salesman Problem.

**Parallel Models:** Basic concepts, Performance measures, Parallel algorithms, Parallel Complexity, Analysis of Parallel Addition, Multiplications and Divisions, Parallel Evaluation of Arithmetic Expressions.

#### Reference Books:

1. Thomas H Cormen, C.E. Leiserson, R.L. Rivest, C. Stein; Introduction to Algorithms, third edition; PHI.
2. E. Horowitz, S. Sahni, S. Raja Sekaran ; Fundamentals of computer Algorithms;

### MCA 504 : SIMULATION & MODELLING

Theory & Tutorial: 4 hours per week (4 Credits)

Examination: Theory Paper – 3 hours; Max. Marks – 100

Note:

1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### Unit I

System Models: Concept, Environment, Continues and Discrete systems, Types of Models: Subsystems, System Analysis, System design; System Simulation Technique, Monte Carlo method, Types of System Simulation.

#### Unit II

Continuous System Simulation – Continuous System Models, Methods, Digital-Analog Simulators and Feedback systems.

Dynamic System – Concepts, Elements of System Dynamic Modeling; Exponential Growth, Decay & Modified models; Generalization of Growth models. System Dynamic Diagrams. Multi-Segment Models; Feedback in Socio-Economic System; Dynamo Language.

#### Unit III

Probability concepts in simulation: Stochastic variables and probability functions; Discrete system simulation; fixed time step v/s event-to-event model. Generation of Random numbers. Monte Carlo Computation V/S Stochastic simulation.

Simulation of Queuing system, Simulation of single and two server queuc, Network Model of a project.

#### Unit IV

Introduction to GPSS- Elements, Events; Control Statements , Programs.

Case study: Simulation of an autopilot, Telephone system, Inventory system & Supermarket.

**MCA 505 C01: Bio-Informatics**

Theory & Tutorial: 4 hours per week ( 4 Credits)  
 Examination: Theory Paper - 3 hours; Max. Marks - 100

**Note:**

1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

**Unit I**

**Introduction to Bioinformatics:** Definition and History of Bioinformatics. Internet and Bio-Informatics, Introduction to Data Mining, Applications of Data Mining to Bio-informatics, Problems and Applications of Bio-informatics.

**Unit II**

**Bioinformatics Resource and Software's:** Introduction to Primary Sequence Databases & Secondary Composite Databases. Genome Information Resource-DNA Sequence database & Analysis, CDNA Libraries and ESTs.  
**Bio-Informatic S/W-**Clustal V, Clustal W 1.7, RasMol, Oligo, Molscript, Treeview, Alscript, Genetic Analysis Software, Phylip.

**Unit III**

**Biocomputing:** Introduction to String Matching Algorithms, Database Search Techniques, Sequence Comparison and Alignment Techniques, Use of Biochemical Scoring Matrices, Introduction to Graph Matching Algorithms, Automated Genome Comparison and its Implication, Automated Gene Prediction, Automated Identification of Bacterial Operons and Pathways; Introduction to Signaling Pathways and Pathway Regulation. Gene Arrays, Analysis of Gene Arrays

*Rajeev Surostava*      *A. K. Singh*      *P. S. D.*      *Ashwin*  
 (Ashwin, Kumar)      *Cheng*

Unit IV

Markov chains and applications: Machine Learning Methods, Hidden Markov models, Applications of HMM in gene identification and Profiles HMMs, Neural Networks and Support Vector machines

MCA 505 C02 : Geo-Informatics

Theory & Tutorial : 4 hours per week ( 4 Credits)  
Examination : Theory Paper – 3 hours; Max. Marks – 100

Note :

1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carry 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

Unit I

Basic concepts about Special information, Definition, Historical evaluation and need for spatially based resource information system. objectives of GIS-Manual v/s automated GIS. Geo-informatics technologies and the technologies used in Geographical Studies. Geoinformatics-Spatial and Non -Spatial data Management.

**Unit II**

Data structure types of data structure, Raster and Vector formats, advantages and disadvantage of various data structures and data formats. Geo Spatial DBMS. Data input: Data Pre-processing, methods of data capture, digitization and scanning methods, commonly used map projections and ellipsoids.

**Unit III**

The format of GIS- Handling digital Geographical Information Data- Analysis of single data planes in Raster format- Analysis of multiple data planes in Rater format- Uses of topographic data in Raster format- Data structures for thematic maps.

**Unit IV**

Digital Elevation Model (DEM): need, methods, data sources and products of DEM- Digital Terrain Modeling (DTM)- Input verification, storage and methods of data analysis for Spatial modeling-Methods of GIS and Spatial interpolation. Web GIS Technology and Geo-informatics-MISDBMS. Applications of Geo-Informatics System.

### MCA 505 C03 : ERP Systems

Theory & Tutorial : 4 hours per week ( 4 Credits)

Examination : Theory Paper – 3 hours; Max. Marks – 100

Note :

1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

#### Unit I

**Introduction:** Enterprise wide information system, Custom built and packaged approaches. Needs and Evolution of ERP System, Common myths and evolving realities.

**ERP Technologies :**ERP and Related Technologies, Business Process Reengineering and Information Technology, Supply Chain Management, Relevance to Data Warehousing, Data Mining and OLAP, ERP Drivers, Decision support system.

#### Unit II

**ERP System :** ERP Domain, ERP Benefits classification, Present global and Indian market scenario, milestones and pitfalls, Forecast, Market players and profiles, Evaluation criterion for ERP products.

**ERP Life Cycle:** Adoption decision, Acquisition, Implementation, Use & Maintenance. Evaluation and Retirement phases, ERP Modules.

#### Unit III

**ERP Framework :** Framework for evaluating ERP. Analytical Hierarchy Processes (AHP), Applications of AHP in evaluating ERP, Selection of Weights, Role of consultants, vendors and users in ERP implementation; Implementation strategies, ERP Customization, ERP-A manufacturing Perspective.

*Signature*

*Signature*

*Signature*

*Signature*  
(ASHOK KUMAR)

*Signature*

**Evaluation of ERP System** :Critical success and failure factors for implementation, Model for improving ERP effectiveness. ROI of ERP implementation, Hidden costs ERP success inhibitors and accelerators, Management concern for ERP success, Strategic Grid- Useful guidelines for ERP Implementations.

**Unit IV**

**Analysis of ERP Implementations:** Technologies in ERP System and Extended ERP, Case Studies Development and Analysis of ERP Implementations in focusing the various issues discussed in above units through Soft System approaches or qualitative Analysis tools, Learning and Emerging Issues, ERP and E-Commerce.

**Concept of E-governance** : Concept, E-Governance frame work, area of application like public sector, service industry.

**Reference Books :**

1. Lexis Leon; Enterprise Resource Planning;TMH
2. Brady, Manu. Wegner; Enterprise Resource Planning; TMH
3. N. K. Venkitakrishnan, Vinod Kumar Garg; Enterprise Resource Planning : Concepts and Practice; PHI Learning.

**MCA 505 C04 : Embedded Systems**

Theory & Tutorial : 4 hours per week ( 4 Credits)

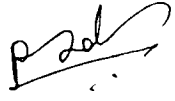

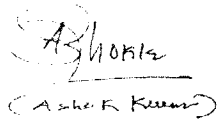

Examination : Theory Paper – 3 hours; Max. Marks – 100

**Note :**

1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

**Unit I**

**Introduction** : An Overview of Embedded system, Requirement, Challenges issues, and trends software development.

(11)

**Applications of Embedded Systems** : Application market segments, control system and industrial automation, Data communication, Networked Information Appliances, Telecommunications.

### Unit II

**Hardware Architecture**: Processor, Memory, Latches and Buffers, ADC and DAC, Application specific control, Display units, Keypads, DSP.

**Microcontroller and their applications, Communication interfaces**: Serial interface. I<sup>2</sup>C, 1394, USB Infra red, Ethernet and PCI bus.

### Unit III

Embedded system development process: requirement, system architecture, opening system and processes: Development platform and tools, HLL support Cross compilers, Linux and Windows CE based development Tools. Mobile/handheld systems.

### Unit IV

**Basic idea of embedded system applications** : mobile networks, GPS , Real time system Database application, Networked and JAVA – enabled information appliances, Mobile JAVA applications.

### Reference Books :

5. Frank Vahid, Tony Givargis; Embedded System Design, 20006; John Wiley.

**Unit I**

**Wireless communication** :Cellular systems- Frequency Management and Channel Assignment Types of Handoff and their characteristics, dropped call rates & their evaluation. MAI SDMA. FDMA, TDMA, CDMA. Cellular Wireless Networks.

**Unit II**

**Wireless Networks**: Wireless Sensor Networks- Principles and Characteristics, Constraint Distributed Processing, Wireless LAN, IEEE 802.11 Standards, Architecture, Services. Mobile Adhoc Networks- WiFi and WiMAX, Wireless Local Loop.

**Unit III**

**Mobile Communication Systems** : GSM-Architecture-Location Tracking and Call Setup Mobility Management, Handover-Security; GSM & SMS, International Roaming for GSM. Call Recording functions, Subscriber and Service Data Management; Mobile Number Portability VoIP Service for Mobile Networks; GPRS -Architecture, GPRS Procedures-attach and detach Procedures-PDP Context Procedure-Combined RA/LA update procedures-Billing.

**Unit IV**

**Mobile Network and Transport Layers**: Mobile IP, Dynamic Host Configuration Protocol, Mobile Ad Hoc Routing Protocols, Multicast routing, TCP over Wireless Networks. Indirect TCP, Snooping TCP, Mobile TCP, Fast Retransmit / Fast Recovery, Transmission Time Out Freezing, Selective Retransmission, Transaction Oriented TCP, TCP over 2.5 / 3G wireless Networks.

**Application Layer** :WAP Model, Mobile Location based services, WAP Gateway, WAP protocols, WAP User Agent Profile, Caching Model, Wireless Bearers for WAP. WML, WMLScripts- WTA- iMode- SyncML.

**MCA 506 D02 : Object Oriented Software Engineering**

Theory & Tutorial : 4 hours per week ( 4 Credits)

Examination : Theory Paper - 3 hours; Max. Marks - 100

Note :

- 1. Candidate has to attempt five questions in all. All questions carry equal marks.
- 2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
- 3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

**Unit I**

Introduction : Scope and Need of OO Software Engineering, Evaluation of Object Model, Elements of Objects Model. Unified Modeling Language, Basic Structures and Modeling Classes, Common Modeling Techniques, Relationship, Common Mechanism, Class Diagrams.

**Unit II**

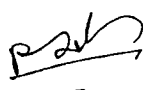

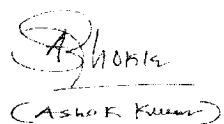

Advanced Structured Modeling, Advanced Classes and Relationship, Interfaces Types and Roles, Instance and Object Diagram. Basic Idea of Behavioral Modeling. Object-Oriented Concepts and Principles, Identifying Elements of Object Model. Object Oriented Projects Metrics and Estimation.

**Unit III**

Design for Object-Oriented SYSTEMS, The System Design Process. Object Oriented Testing : Testing of OOA and OOD models, Object-Oriented testing Strategies. Inter class testing. Technical Metrics for OO Systems, Class Oriented Metrics, Metrics for OO Projects.

**Unit IV**

Advanced Topics in Software Engineering : Software Reuse, Component based Software Engineering and Development. Classifying and Retrieving Components. Introduction to Distributed Software Engineering, Service Oriented Architecture, Aspect Oriented Software Engineering

**Reference/Text Books :**

1. Designing Flexible Object Oriented Systems with UML. By Charls Richter Techmedia.
2. UML. users guide by Booch. Rumbaugh, Jacobson –Addison Wesley
3. Object Oriented Modeling and Design by Rumbaugh.
4. Object Oriented Analysis & Design – Practical Applications By Booch – Addison Wesley.

**MCA 506 D03 : Web Information System**

Theory & Tutorial : 4 hours per week ( 4 Credits)

Examination : Theory Paper – 3 hours; Max. Marks – 100

- Note :
1. Candidate has to attempt five questions in all. All questions carry equal marks.
  2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carrying 2 marks each.
  3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

**Unit I**

**Internet foundations:** Fundamentals of network and hardware architecture for the Internet. Network protocols for the web, HTTP, DNS, and DHCP, client – server and peer- to- peer architectures.

**Introduction to Web designing:** Hypertext Markup Language (HTML), Cascading Style Sheet(CSS), forms, and tables. XML and JavaScript.

**Unit II**

**Advanced Web Application Development:** Development of web application using JDBC, Triggers, stored procedures, Use of Oracle DBMS through JDBC, Java servelets, Java Server Pages, and Java Database Connectivity (JDBC). Client-side scripting with JavaScript, Packaging and deployment of web applications.

**Unit III**

**Search and Design:** Web Wide Search, Web Searching Overview, How Users Search, Search Engine Promotion, Optimizing Search Engine, The need for Local Search, The process of adding a search facility, Designing the search Interface, Advance Search-Form Design, Result-Page Design.

*[Handwritten signature]*

*[Handwritten signature]*

*[Handwritten signature]*  
(ASHOK KUMAR)

Unit IV

Site Maps and Indexes: Site Map, Designing Site Map showing Scope and Destination Choice  
Producing Site Map. Benefits of Geographical Navigation: Site Indexes, Tours.

The Features of Web Design: The Near Feature, Rise Of Broadband, Effects of Community  
Contents Overloads Issue, The Web Life Style.

Reference/Text Books :

1. Thomas A. Powell, "The Complete Reference Web Designing", TMH.
2. Jamel Jawarski, "Java 2 Unlimited".
3. Allumaraju, "Professional Java Server Programming".

MCA 506 D04 : Pattern Recognition Systems

Theory & Tutorial : 4 hours per week ( 4 Credits)

Examination : Theory Paper – 3 hours; Max. Marks – 100

Note :

1. Candidate has to attempt five questions in all. All questions carry equal marks.
2. Question No. 1 covering whole syllabus will consists of 10 short answer questions carry 2 marks each.
3. Question No. 2 to 5, each of 20 marks, will be framed by taking one question from each unit. There will be an internal choice within the unit.

Unit I

Introduction to pattern recognition, feature detection, classification. Review of probability theory, conditional probability and Bayes rule.

Random vectors, expectation, correlation, covariance. Review of linear algebra, linear transformations; Decision theory, ROC curves, Likelihood ratio test.

Unit II

Linear and quadratic discriminants, Fisher discriminant Sufficient statistics, coping with missing or noisy features.

Template-based recognition, eigenvector analysis, feature extraction, Training methods.

Maximum likelihood and Bayesian parameter estimation, Linear discriminant/Perception learning.

ASHOK K  
(ASHOK K. KUMAR)

6

**Unit III**

Optimization by gradient descent, SVM, k-nearest-neighbor classification, Non-parametric classification, density estimation, parzen estimation, Unsupervised learning, clustering, vector quantization, k-means.

**Unit IV**

Mixture modeling, optimization by Expectation-Maximization, Hidden Markov models. Viterbi algorithm, Baum-Welch algorithm.  
Linear dynamical system; Kalman filtering and smoothing, Bayesian networks, independent diagrams, Decision trees, Multi-layer Perceptrons.

**Reference Books:**

1. Richard O. Duda, Peter E. Hart and David G. Sotrk, "Pattern Classification" Wiley

**MCA 511 : ADA Lab**

Practical Lab : 6 Hours per Week (4 Credits)  
 Examination : Practical examination : 4 Hours Max. Marks : 100

Lab Exercise based on Theory Paper MCA 503

**MCA 522: Mini Project**

Practical Lab : 6 Hours per Week (4 Credits)  
 Examination : Practical examination : 4 Hours Max. Marks : 100

Technology : Use .NET/JAVA/JSP/PHP/Android/Web Technology.

**MCA 523: Seminar**

Practical Lab : 6 Hours per Week (4 Credits)  
 Examination : Practical examination : 4 Hours Max. Marks : 100

Each candidate have to give a Seminar (Power Point Presentation and its Report) on any topic of interest related to latest IT/Computer Sc. /Mobile Technology in the presence of Assessment Committee.
