B.SC HOME SCIENCE – PART II

SCHEME OF EXAMINATION

The number of papers and the maximum marks for each paper together with the maximum marks required for a pass course are shown in the scheme of examination against each subject separately. It will be necessary for a candidate to pass in theory as well as practical part of a subject paper, wherever prescribed, separately. Classification of successful candidates shall be as follows:

First Division 60% of the aggregate marks prescribed in honors and subsidiary subjects of Pt.I, Pt.II and Pt.III examination taken together.

Second Division 48% of the aggregate marks prescribed in honors and subsidiary subjects of Pt.I, Pt.II and Pt.III examination taken together.

The theory examination paper will consist of three parts:

1. **Part I** – will comprise of 10 very short answer questions of 2 marks each. The answer to each question must be within the limit of 20-40 words.
2. **Part II** - will comprise of 5 short answer questions of 4 marks each. The answer to each question must be within the limit of 50-60 words.
3. **Part III** - will comprise of 6 long answer questions (essay type) of 20 marks each with internal choice in each question. Candidate will need to attempt only 3 questions.

B.SC. HOME SCIENCE PART II

APPAREL TECHNOLOGY (THEORY VI)		
Max Marks: - 100 marks Teaching workload: 4 hours/week Total teaching workload: 96 hours/year		
Objectives : <ol style="list-style-type: none"> 1. To teach students about evolution and socio psycho aspects of clothing 2. To educate about selection of clothing 3. To familiarize the students with the garment production 		
UNIT-I		Hours
1.	Importance of clothing	3
2.	Social and psychological aspects of clothing <ul style="list-style-type: none"> • Functions of clothing • Theories of clothing • Clothing in relation to status, culture and rituals • Individuality and conformity • Conspicuous consumption 	10
3.	Evolution of clothing in Indian context <ul style="list-style-type: none"> • Sources of evidence for the study of historic costumes • Timeline of clothing of draped style of early civilization till stitched style of 21st century. 	8
UNIT-II		
4.	Selection of suitable fabrics and garments for <ul style="list-style-type: none"> • Age – infants, toddlers, pre-school children, school going children, adolescents • Climate, occasion, occupation, fashion, figure • Clothing for people with special needs: maternity and lactation, old age and physically challenged. • Selection of readymade garments • Appearance– Size, design, line and colours, • Fabric- Durability, ease of care • Workmanship- Cutting, sewing and finishing • Cost & Fitting 	20
5.	Production in apparel industry <ul style="list-style-type: none"> • Fusing & pre folding machines • Cutting & spreading – marker types and calculation • Spreading process and equipments • Types of cutting machines • Ticketing and bundling – purpose and types 	15

UNIT-III		
6.	Quality specification system for garment manufacture <ul style="list-style-type: none"> • Quality in raw material • Quality in process production • Quality in final garment 	12
7.	Computer application / automation in garment manufacturing	10
8.	Merchandising and Retailing Window display <ul style="list-style-type: none"> • Interior display • Career in merchandising • Future of merchandising • Meaning and importance of Retailing • Types of retail organisations – Speciality stores, Departmental stores, Franchise retailing, shopping malls etc. 	18

APPAREL CONSTRUCTION (PRACTICAL - VI)		
Max Marks: - 75 marks		
Teaching workload: one practical/week (2 hours/practical)		
Total teaching workload: 24 practicals/batch		
Objectives:		
<ol style="list-style-type: none"> 1. To equip students with basics of sewing 2. To instruct them to learn about children and women clothing 		
Contents:		Practical
1.	Taking body measurements for different types of garments.	1
2.	Hand stitches <ul style="list-style-type: none"> • Functional : Temporary , Permanent , basting , hemming , running , back stitch 	7

	<ul style="list-style-type: none"> • Plain seam and finishes • Enclosed seam :- Run & fell , French seam • Fasteners :- Hook with eye, shank button, loop & button • Plackets :- Even hem , continuous wrap , two piece placket • Edge finishing : – shaped facing , bias facing & bindings • Disposal of fullness :- pin tucks , simple gathers , pleats - knife , box 	
3.	Construction of Childs and Adult Bodice block with sleeve block	2
4.	Drafting & Construction of Garments Children - 'A' line frock with variations in sleeve and collar / gathered frock with variations in sleeve and collar.	10
5.	<ul style="list-style-type: none"> • Women - Saree blouse and petticoat./ Kurta with salwar or churidar Visit to garment production unit.	4

Examination Scheme

1. Major Problem – 45 Marks (Drafting, Stitching and Finishing)
2. Minor Problem – 15 Marks (Sample)
3. Internal – 15 Marks

EXTENSION EDUCATION AND DEVELOPMENT (THEORY VII)

Max Marks: - 100 marks

Teaching workload: 4 hours/week

Total teaching workload: 96 hours/year

Objectives :

1. To make the students understand the concept of Extension and its related aspects.
2. To understand the existing supports structure for development efforts.
3. To understand the role of various organizations/institutions in community development.
4. To sensitize the students towards major developmental issues.

UNIT I

History of Development in India

Hours

1.	Changing concepts and Approaches in development.	7
2.	Concept of Community Development- Evaluation of Community Development Programmes in India since independence.	7
3.	History of Extension Activities in India and Scope of Home Science Extension for meaningful participation in community development in India	12
4.	Role of- voluntary organizations, KVK, village institutions - School, Panchayat and Co-operatives in development.	10

UNIT II

Extension Education

5.	Concept and Types of Education- Formal, Non-formal, Informal and Extension Education- Meaning, Philosophy, Objectives, Elements, Principles, Process of Extension. Extension worker- Qualities and Role	13
6.	Extension models- Technology – Innovation – Transfer Model, Empowerment/ Participation Model	7
7.	Participatory methods and approaches – PRA, RRA, PLA	13

UNIT III

Developmental Programmes

8.	Relevant Developmental issues in India – Poverty, health and Nutrition, Population Growth, Illiteracy. Neglect in early childhood: causes, extent and communication of	12
----	--	----

9.	less than 3 years for health and nutrition care. Study the important Flagship developmental programmes of Government of India with special reference to their objectives, target groups, activities, organizational structure and financial support.	15
----	---	----

EXTENSION EDUCATION AND DEVELOPMENT (PRACTICAL- VII)

Max Marks: - 50 marks

Teaching workload: one practical/week(2 hours/practical)

Total teaching workload: 24 practicals/batch

Objectives :

1. To develop skills in planning and presentation of extension teaching methods.
2. To understand the role of village level organization in the development and their functioning.

Contents :

Practical

1.	Visit to village organizations mentioned in the theory and submit the report for the same.	4
2.	Develop skills in extension teaching methods- Demonstration, drama/ role play/ puppetry, group discussion, talk and bulletin board display.	14
3.	Select any Flagship programme or developmental issue and present same in the class room.	6

Examination Scheme

1. Evaluation of project report on selected developmental issues prepared by the student during the session by the external examiner 20 marks
2. Plan and present one extension teaching method given by the external examiner 15 marks
3. Viva 5 marks
4. Internal Assessment- record and class room participation 10 marks

LIFE SPAN DEVELOPMENT(THEORY VIII)

Max Marks: - 100 marks

Teaching workload:4 hours/week

Total teaching workload:96 hours/year

Objectives:

1. To acquaint the students with the process of life span development.
2. To build understanding of various developmental concepts and achievements.
3. To understand the emerging issues and adjustment across life span stage.
4. To sensitize students to understand developmental delays, laps and individual differences in human development.

Seema

Shubh

UNIT I		Hours
1.	PRENATAL- Conception, stages of prenatal development factors affecting prenatal development, hazards and abnormalities during prenatal development, birth process, complication and recent technological advances in prenatal development and care.	12
2.	NEONATE- Adjustment, sensory, perceptual, abilities, feeding practices and care of new born, importance of early stimulation.	10
3.	INFANCY- Milestone of infancy, physical, motor, social, emotional, cognitive and language development.	10
UNIT-II		
4.	EARLY CHILDHOOD (2 Years to 6 Years)- Developmental Milestones, Major Developments, Significance of Early Childhood years, Pre-School Education and Play.	10
5.	MIDDLE CHILDHOOD AND LATE CHILDHOOD (6 Years to 12 Years)- Developmental Milestones, Major Developments, Peer Pressure, Early and Late Maturity and Factors Influencing Major Development.	12
6.	ADOLESCENTS (12 Years to 19 Years)- Developmental Milestones and Major Developments, Pubertal Changes, Growth Spurt, Early and Late Maturity Identity Crisis, Problems and Conflicts in Family. Friendship and Heterosexual and Homosexual Relationship. STDs, Juvenile Delinquency.	12
UNIT-III		
7.	YOUNG ADOLTHOOD (20 Years to 40 Years)- Developmental Milestones, Responsibilities, Adjustments and Challenges, Changing trends in parenting.	10
	<ul style="list-style-type: none"> MIDDLE AGE (40 Years to 60 Years)- Developmental milestones, Characteristics, Changes, Challenges and Adjustment, Health issues and Menopause, Mid life crisis, Course Work and Satisfaction. LATE ADULTHOOD/ AGING (60 Years onwards)- Developmental Changes, Physical, Physiological, Health, Cognitive changes, Retirement, Financial Problems and Adjustment to loneliness, Family settings, Illness. Recreational interest, Provisions and Policies for Aging Adults. 	10

HUMAN DEVELOPMENT (PRACTICAL - XIII)		
Max Marks: - 50 marks		
Teaching workload: one practical/week (2 hours/practical)		
Total teaching workload: 24 practicals/batch		
Objectives :		
<ol style="list-style-type: none"> Students will gain insight into the growth patterns, developmental characteristics and activities of children in a practical situation. 		

2. They will also learn to understand significant issues related to adolescents, adults and ageing people.	
Contents :	Practical
1. Study of the reflexes of new born in child clinics.	4
2. Anthropometric measurement of children from birth to 6 years. Plotting and interpretation of data as per WHO norms.	4
3. Planning, Preparation and conduction of developmentally appropriate activities to enhance overall development of children: physical, motor, language, cognitive, social and emotional (AV aids).	8
4. Focus group discussion with adolescents to understand their aspirations, educational and career choices.	4
5. Preparation of a brief questionnaire to identify the problems faced by adults and aging people in communities. Report the information as individual case profile.	4
Examination Scheme	
1. Major Problem – Preparation of aids	10 marks
2. Minor Problem –	
• Plotting and interpretation of data on group	10 marks
• Recognition of reflexes	7 marks
• Preparing Questionnaire	8 marks
3. Viva	5 marks
4. Internal	10 marks
NUTRITIONAL BIOCHEMISTRY (THEORY – IX)	
Max Marks: - 100 marks	
Teaching workload: 4 hours/week	
Total teaching workload: 96 hours/year	
Objectives:	
This course will enable the students to –	
1. Develop an understanding of the fundamentals of biochemistry.	
2. To understand the biochemical process and systems as applicable to human nutrition.	
UNIT I	
	Hours
1. Introduction to Nutritional Biochemistry : • Definition and Objectives. • Scope of Biochemistry: knowledge of electron , proton , neutron , atomic number, atomic weight, valency, structure of carbon, pH, buffer, normal and molar solutions. • Role of Biochemistry in clinical nutrition.	4
2. Carbohydrates • Definition, composition and classification of Carbohydrates. • Functions, Deficiencies and Sources. • General properties of monosaccharides, disaccharides and polysaccharides: oxidation reduction, acetylation, inter conversion, reducing property, osazone	10

3.	<ul style="list-style-type: none"> formation. Digestion and Absorption. <p>Lipids</p> <ul style="list-style-type: none"> Definition and classification of lipids. Functions, Deficiencies and Sources. Important properties of fats: Hydrogenation, halogenation, Iodine number , rancidity, acid number. Types and properties of fatty acids, essential and non essential fatty acids. Types and importance of phospholipids , glycolipids and cholesterol. 	8
4.	<ul style="list-style-type: none"> Digestion and Absorption. <p>Proteins</p> <ul style="list-style-type: none"> Definition, composition and classification of Proteins. Functions, Deficiencies and Sources. Essential and Non essential Amino acids. Quality of protein, supplementary value of protein. Methods used in determining Quality of proteins – PER, NPU, BV, and Nitrogen Balance. 	11
UNIT – II		
5.	<p>Nucleic Acid</p> <ul style="list-style-type: none"> Types , composition Functions of Nucleic Acids. Elementary knowledge of Biosynthesis of proteins. 	8
6.	<p>Vitamins (A, D, E, K, B complex and C).</p> <ul style="list-style-type: none"> Definition and Classification. Functions, Deficiencies and Sources. Digestion and absorption 	12
7.	<p>Minerals (Calcium, Phosphorus , Iron , Iodine , Fluoride , Copper , Zinc, Sodium and Potassium).</p> <ul style="list-style-type: none"> Definition and Classification. Functions, Deficiencies and Sources. Absorption and Factors affecting absorption. 	11
UNIT – III		
8.	<p>Enzymes</p> <ul style="list-style-type: none"> Definition and classification of enzymes Mechanism of enzyme action, Factors affecting enzyme reactions: substrate, temperature, pH activator and inhibitor. 	12
9.	<p>Intermediary Metabolism</p> <ul style="list-style-type: none"> Carbohydrates - Glycolysis (aerobic and anaerobic), TCA Cycle, Electron Transport chain, glycogenesis, glycogeneolysis, gluconeogenesis, blood sugar regulation. Lipids - Beta oxidation and ketosis. Proteins – General reactions of amino acid metabolism: deamination, transamination, decarboxylation and urea cycle. 	20

NUTRITIONAL BIOCHEMISTRY(PRACTICAL-IX)

Max Marks: - 50 marks

Teaching workload: one practical/week(2 hours/practical)

Total teaching workload: 24 practicals/batch

Objectives:

This course will enable the student to understand:

1. Qualitative analysis of carbohydrates and proteins.
2. Quantitative analysis of carbohydrates and fats
3. Identification of adulterants

Contents:

Practical

1.	Qualitative analysis of known mono-saccharides: (a) Glucose (b) Fructose (c) Galactose	03
2.	Qualitative analysis of unknown monosaccharides	01
3.	Qualitative analysis of known disaccharides (a) Maltose (b) Lactose (c) Sucrose	03
4.	Qualitative analysis of unknown disaccharide	01
5.	Qualitative analysis of known polysaccharides (a) Starch (b) Dextrin (c) Glycogen	03
6.	Qualitative analysis of unknown polysaccharides	01
7.	Qualitative analysis of protein – egg albumin and milk protein casein.	02
8.	Qualitative analysis of fat & oil.	01
9.	Estimation of Moisture content of fresh peas.	01
10.	Estimation of ash content of milk powder.	01
11.	Estimation of reducing sugar in honey by Benedict reagent.	01
12.	Estimation of acid value of rancid ground nut oil.	01
13.	Estimation of Iodine value of ground nut oil.	01
14.	Estimation of vitamins in lemon juice by dye method.	01
15.	Qualitative testing of some food adulterants in (a) Metanil yellow in turmeric powder, arhar dal and yellow sweets. (b) Vanaspati in pure ghee. (c) Chalk powder and sand in wheat flour.	02

- (d) Aluminium in sweets.
- (e) Saccharine in sugar cane.
- (f) Argemone oil in mustard oil.
- (g) Lead chromate and coal tar dye in turmeric powder.
- (h) Starch in milk.

INTERIOR SPACE DESIGN (THEORY -X)

Max Marks: - 100 marks

Teaching workload:4 hours/week

Total teaching workload:96 hours/year

Objectives :

1. Gain knowledge about the use of art principles in the field of interior.
2. To become aware regarding waste management.

UNIT-I

House Interiors & its treatment

Hours

1.	Wall & wall finishes <ul style="list-style-type: none"> • Definition & importance • Types of walls • Wall treatments: paints, plaster, panelling, wall papers 	4
2.	Floor & floor coverings <ul style="list-style-type: none"> • Definition & importance • Types of floor finishes • Floor coverings • Types of floor covering 	4
3.	Ceilings <ul style="list-style-type: none"> • Definition & importance • Types of ceilings • Treatments for ceilings 	4
4.	Door & Window <ul style="list-style-type: none"> • Parts of a door & window • Types of doors & windows 	6
5.	Arches <ul style="list-style-type: none"> • Introduction & importance • Types of arches 	3
6.	Stairs <ul style="list-style-type: none"> • Introduction & importance • Types of stairs 	3

UNIT-II

Room decoration

7.	Furniture <ul style="list-style-type: none"> • Types of furniture • Selection use & care • Ergonomic design of furniture • Arrangement of furniture in various rooms 	4
8.	Using Anthropometric measurements in room for furniture arrangement <ul style="list-style-type: none"> • Bed room • Drawing room • Dining room • Children room 	4
9.	Flower decoration <ul style="list-style-type: none"> • Selection of plant material for • Fresh arrangement • Dry arrangement 	4
