

# University of Rajasthan Jaipur

## SYLLABUS

### M.Sc. BOTANY

(Annual Scheme)

M.A./M.Sc. (Previous) Examination 2021

M.A./M.Sc.(Final ) Examination 2022

*Raj / Jaipur*

Dy. Registrar (Acad.)  
University of Rajasthan  
JAIPUR

M.Sc. (BOTANY)  
M. Sc. (ANNUAL PATTERN)

---

M. Sc. Previous

Paper I	Cell & Molecular Biology of Plants
Paper II	Cytology, Genetics & Cytogenetics
Paper III	Biology & Diversity of Lower Plants: Cryptogams
Paper IV	Taxonomy & Diversity of Seed Plants
Paper V	Plant Physiology & Metabolism
Paper VI	Microbiology and Plant Pathology

M.Sc. Final

Paper VII	Plant Morphology, Developmental Anatomy and Reproductive Biology
Paper VIII	Plant Ecology
Paper IX	Plant Resource Utilization & Conservation
Paper X	Biotechnology & Genetic Engineering of Plants & Microbes
Paper XI	Elective I
Paper XII	Elective II

Elective Papers XI & XII

Papers XI (a) : Advanced Plant Pathology I

Paper XII (a) : Advance Plant Pathology II

OR

Papers XI (b) : Seed Science and technology I

Paper XII (b) : Seed Science and technology II

OR

Papers XI (c) : Ecosystem Ecology

Dy. Registrar  
(Academic)  
University of Rajasthan  
JAIPUR

(174)

Paper XI (c) : Advanced Plant Biology

OR

Papers XI (d) : Advanced Plant Physiology I

Paper XII (d) : Advanced Plant Physiology II

OR

Papers XI (e) : Advanced Morphology and Morphogenesis- I

Paper XII (e) : Advanced Morphology and Morphogenesis- II

OR

Papers XI (f) : Biosystematics of Angiosperms I

Paper XII (f) : Biosystematics of Angiosperms II

OR

Papers XI (g) : Biotechnology- I

Paper XII (g) : Biotechnology- II

M.Sc. Botany

M.Sc. (Previous)

There will be six papers in theory, each of three hours duration, 100 marks each and two practicals carrying 150 marks each (10% marks are reserved for viva and 15% records in each examination). Each practical examination will be of 6 hours duration to be completed in one day.

Each theory paper will have 9 questions, out of which a student has to attempt 5 questions and the question No. 1 will be compulsory. The question No. 1 will carry 20 marks and will be of short type of questions with a limit of 20 words.

M.Sc. (Final)

There will be six papers, four compulsory and two elective in theory of 3 hours duration carrying 100 marks each and two practicals each as follows:

- i. Practical for compulsory papers of 200 marks of 8 hours duration to be completed in two days.
- ii. Practical for elective papers 100 marks of 4 hours duration to be completed in one day.

Each theory paper will have 9 questions, out of which a student has to attempt 5 questions and the question No. 1 will be compulsory. The question No. 1 will carry 20 marks and will be of short type of questions with a limit of 20 words.

3

**M.Sc. Botany**  
**Scheme of Examination**

**M.Sc. (First)**

There will be two papers, each of three hours duration. 100 marks each and total marks 200. 15 minutes each for reading. Each practical examination will be of 3 hours duration to be completed in one day.

Each theory paper will have 9 questions, out of which student has to attempt 5 questions including question No. 1 which is compulsory. The question No. 1 will carry 20 marks and will be of short answer type. The other 4 questions will be of long answer type. Each long answer type question will carry 10 marks.

**M.Sc. (Final)**

There will be six papers, four from theory and two from practical. Each theory of a hours duration carrying 100 marks each and practical each carrying 50 marks as follows:

- (i) Practical for one day, papers of 200 marks each. Each paper to be completed in one day.
- (ii) Practical for one day, papers of 100 marks each. Each paper to be completed in one day.
- Each theory paper will have 9 questions, out of which student has to attempt 5 questions including question No. 1 which is compulsory. The question No. 1 will carry 20 marks and will be of short answer type. The other 4 questions will be of long answer type. Each long answer type question will carry 10 marks.

- Paper-I : Cell and Molecular Biology of Plants
- Paper-II : Cytology and Cytogenetics
- Paper-III : Biology and Diversity of Lower Plants : Cryptogams
- Paper-IV : Taxonomy and Diversity of Seed Plants
- Paper-V : Plant Physiology and Metabolism
- Paper-VI : Microbiology and Plant Pathology

Paper-I : Cell and Molecular Biology of Plants  
**Scheme of Examination** **Max. Marks : 100**  
The paper will have 9 questions, out of which a student has to attempt 5 questions including the question No. 1 which will be compulsory.

4

...atory. The question No. 1 will carry 20 marks and will be of several short objective type questions such as multiple choice type, one line answer type, one word type and fill in the blank type.

Unit - I

The dynamic cell: Structural organization of the plant cell, specialized plant cells, chemical composition, Biochemical energetics.

Cell wall: Structure and function of cellulose, hemicellulose, pectin, lignin.  
A. Plasma membrane: Structure, composition, functions, sites for ATP synthesis, transport of small molecules and macromolecules, osmotic potential, water potential.

Chloroplast: Structure, function, photosynthesis, electron transport, photosynthesis, microtubule organization, plant vacuoles, cytoskeleton, chloroplast movement.

Plant vacuoles: Structure, function, osmotic potential, water potential, turgor pressure, cell wall, cytoskeleton, chloroplast movement.

Ribosomes: Structure, function, protein synthesis, translation, initiation, elongation and termination, role of tRNA.

Plasma membrane: Structure, function, transport of small molecules and macromolecules, osmotic potential, water potential, turgor pressure, cell wall, cytoskeleton, chloroplast movement.

Unit - II

Cell cycle and apoptosis: Control mechanism, role of cyclins and cyclin-dependent kinases, cell division, cytokinesis, and cell plate formation, mechanisms of programmed cell death.

Other Cellular organelles: Structure and functions of mitochondria, Golgi apparatus, lysosomes, and endoplasmic reticulum.

Prof. Jais  
Dy. Registrar  
(Academic)  
University of Rajasthan  
JAIPUR

*Suggested laboratory exercises*

1. Isolation of ribosomal RNA and the activity of the marker enzyme, aspartate aminotransferase (AAT).
2. Isolation of chloroplasts and the SDS-PAGE profile of proteins to differentiate the two subunits of Rubisco.
3. Isolation of nuclei and identification of histones by SDS-PAGE.
4. Isolation of plant DNA and its quantitation by a spectrophotometric method.
5. Isolation of DNA and preparation of 'cot' curve.

Raj/Tas  
UNIVERSITY REGISTRAR  
(Academic)  
University of Rajasthan  
JAIPUR

6. Restriction digestion of plant DNA, its separation by agarose gel electrophoresis and visualization by ethidium bromide staining.

7. Isolation of RNA and quantification by a spectrophotometric method.

8. Separation of plant RNA by agarose gel electrophoresis and visualization by EtBr staining.

9. Northern blot analysis using a gene specific probe.

10. Southern blot analysis using a gene specific probe.

11. Microtitre plate assay - Laboratory method, ELISA and its applications.

12. Assay for cell viability with FDA for cell viability and cell wall integrity.

University of Rajasthan

Approach: B.L. Puri & C. Ghosh

Paper-II - Cell Biology and Cytology

Scheme of Examinations

Each paper will contain 10 questions out of which  
attempt 5 questions. The questions will be of two types: 5 from  
pulsory. The questions will carry 20 marks each. The  
remaining short questions will carry 10 marks each. The  
total marks for each paper will be 30. The duration of the  
exam will be 1 hour.

#### CELL BIOLOGY

Chromatin organization, Ultrastructure of  
nucleolus and ribosomal RNA, heterochromatin, karyotype analysis, evolution, specialized  
B-chromosomes and sex chromosomes, some pairing.

Structural and numerical changes, cell division,  
reversion and transversion, mutation, gene  
production, of simple and complex molecules,  
DNA, all the cellular components, the  
and monomers.

#### GENETICS

Genetics of prokaryotes and eukaryotes,  
the bacteriophage, the plasmid, the  
in bacteria, genetics of mitochondria, the  
male fertility.

Gene Structure and expression: Gene structure, de-  
trans test, fine structure analysis of eukaryotes, the  
significance, RNA splicing, regulation of gene expression in  
prokaryotes and eukaryotes. Pacopy of genes, metabolic control,  
attenuation and self-termination.

Genetic recombination and gene mapping, Recombination

*Suggested Laboratory Activities*

1. Linear differentiation of chromosomes through banding techniques, such as Q-banding, G-banding and C-banding.
2. Silver banding for mapping nucleolar organizing region, where 18S and 28SrDNA are transcribed.
3. Orcein and Feulgen. Staining of dicaryotic gland chromosomes of Chironomas and Drosophila.
4. Characteristics and behavior of B chromosomes using maize or any other appropriate material.
5. Working out the effect of mono- and tri-activity on plant pheno-

Rej Jay (10)  
By Registrar  
University of Rajasthan  
JAIPUR

- 5. Induction of polyploidy using colchicine, different methods of the application of Colchicine.
- 6. Effect of induced and spontaneous polyploidy on plant phenotype, meiosis, pollen and seed fertility and fruit set.
- 7. Effect of aneuploid polyploidy on plant phenotype, chromosome pairing and chromosome segregation and pollen and seed fertility.
- 8. Meiosis of complex translocation heterozygotes.
- 9. Isolation of chlorophyll mutants, following irradiation and treatment with chemical mutagens.
- 10. Estimation of nuclear DNA content through microdensitometry and flow cytometry.
- 11. Fractionation and estimation of repetitive and unique DNA sequences in nuclear DNA.

2. ... and ... 1998 : Plant Chromosomes : A Practical Manual for and Biotechnology, Harwood Academic, Australia.

Part III : Biology and Diversity of Higher Plants : **Cryptogams**

Students will have 9 questions out of which 4 must be attempted. Questions including the question: "What is the difference between ... and ...?" will carry 10 marks each.

**Phycology:** Algae in diversified habitats (terrestrial, freshwater, marine), thallic organization, cell ultrastructure, reproduction (vegetative, asexual, sexual) criteria for classification of algae: pigments, reserve food, flagella, classification system: features of Protochlorophyta, Chlorophyta, Charophyta, Xanthophyta, Bacillariophyta, Rhodophyta and Rhodophyta : with special reference to *Microcystis*, *Hydrocoleum*, *Drapetaldopsis*, *Coscinodiscus*, algal bloom, algal biofertilizers, algae as food, food and use in industry.

## TAXONOMY AND DIVERSITY OF SEED PLANTS

### Gymnosperms

#### Unit I

Introduction: Gymnosperms, the vessel-less and fruitless seed plants varying in the structure of their sperms, pollen grains, pollen germination and the complexity of their female gametophyte; Evolution of Gymnosperms. Classification of Gymnosperms and their distribution in India. Brief account of the families of Pteridospermales (Lyginopteridaceae, Medullosaceae, Caytoniaceae and Glossopteridaceae). General account of Cycadeoidales and Cordaitales. Structure and reproduction in Cycadales, Ginkgoales, Coniferales, Ephedrales, Welwitschiales and Gnetales.

#### Unit II

### TAXONOMY OF ANGIOSPERMS

- 1) Aims, components, and principles of Taxonomy; Alpha and Omega Taxonomy, documentation and scope.
- 2) Systems of Angiosperm classification: Cronquist, Dahlgren, Thorne and APG-II.
- 3) International Code of Botanical Nomenclature: Principles, rules and recommendations; Taxonomic concept: Hierarchy, species, genus, family and other categories.

#### Unit III

Numerical Taxonomy- Principles, ~~concepts~~, operational taxonomic units (OTU), data processing and taxonomic studies, taximetric methods for study of population variation and similarity- coding, cluster analysis, cladistics, cladogram.

Taxonomic literature: Floras, Monographs, Icons, Library, Manuals, Index, Taxonomic keys.

Taxonomic tools and techniques: Herbarium, serological, Molecular technique, GIS and Mapping biodiversity.

Pg. Jas (14)  
Dy. Registrar  
(Academic)  
University of Rajasthan  
JAIPUR

#### Unit IV

Taxonomic evidences: Morphology, Anatomy, Palynology, Embryology, Cytology, Phytochemistry and Genome analysis.

Phylogeny of Angiosperms: Ancestors of Angiosperms, time and place of origin of Angiosperms; habit of Angiosperm, primitive living Angiosperms, inter relationship among the major group of Angiosperms.

*Suggested Laboratory Exercises*

**Gymnosperms**

1. Comparative study of the anatomy of vegetative and reproductive parts of cycas, Ginkgo, Cedrus, Abies, Picea, Cupressus, Araucaria, Cryptomeria, Taxodium, Podocarpus, Agathis, Taxus, Ephedra and Genetum.
2. Study of important fossil gymnosperms from prepared slides and specimens.

Raj / Jan  
Dy. Registrar  
(Academic)  
University of Rajasthan  
JAIPUR

16

Angiosperms

3. Description of a specimen from representative, locally available families

List of Locally Available Families :

(1) Ranunculaceae, (2) Capparidaceae, (3) Portulacaceae, (4) Caryophyllaceae, (5) Malvaceae, (6) Tiliaceae, (7) Sterculiaceae, (8) Zygophyllaceae, (9) Rhamnaceae, (10) Sapindaceae, (11) Leguminosae, (12) Combretaceae, (13) Myrtaceae, (14) Cucurbitaceae, (15) Umbelliferae, (16) Apiaceae, (17) Rubiaceae, (18) Asteraceae, (19) Primulaceae, (20) Plumbaginaceae, (21) Asclepiadaceae, (22) Convolvulaceae, (23) Solanaceae, (24) Boraginaceae, (25) Polemoniaceae, (26) Acanthaceae, (27) Pedaliaceae, (28) Martyniaceae, (29) Bignoniaceae, (30) Labiatae, (31) Nyctaginaceae, (32) Polygonaceae, (33) Chenopodiaceae, (34) Amaranthaceae, (35) Aizoaceae, (36) Molluginaceae, (37) Euphorbiaceae, (38) Commelinaceae and (39) Cyperaceae.

4. Description of a species based on various specimens to study intraspecific variation: a collective exercise.

5. Description of various species of a genus; location of key characters and preparation of keys at generic level.

6. Location of key characters and use of keys at family level.

7. Field trips within and around the campus; compilation of field notes and preparation of herbarium sheets of such plants, wild or cultivated, as are abundant.

8. Training in using floras and herbaria for identification of specimens described in the class.

9. Demonstration of the utility of secondary metabolites in the taxonomy of some appropriate genera.

10. Comparison of different species of a genus and different genera of a family to calculate similarity coefficients and preparation of dendrograms.

Reg. No. 177  
Dy. Registrar  
(Academic)  
University of Rajasthan  
JAIPUR

**Thylakoid membrane** - photosystem I, photosystem II, photosystem 0, b<sub>6</sub>/f complex, photosystem II and cytochrome b<sub>6</sub>/f complex. Water and O<sub>2</sub> evolution, non-cyclic and cyclic electron transport, electron transport, water-water cycle, proton gradient and photophosphorylation, Calvin cycle, regulation of RuBisCO activity, control of photorespiration, C<sub>4</sub> pathway and its adaptive significance, CAM pathway, similarities between C<sub>3</sub> and C<sub>4</sub> plants, photorespiration pathway, photorespiration, chlororespiration and C<sub>2</sub> concentrating mechanism in micro-organisms.

#### **Glycolysis**

**Respiration** : Anaerobic and aerobic respiration, amphibolic nature of TCA cycle, pentose phosphate pathway, glyoxylate pathway, oxidative phosphorylation, electron transport, high energy compounds : their synthesis and utilization.

**Fat metabolism** : synthesis of long chain fatty acids, lipid biosynthesis, and oxidation.

**Secondary metabolites** : biosynthesis, regulation of secondary metabolites with special reference to terpenoids, alkaloids and steroids.

#### **Fungi**

**Plant growth regulators** : Auxins - chemical nature, biosynthesis, physiological effects and mode of action.

**Gibberellins** - chemical nature, biosynthesis, physiological effects and mode of action.

**Cytokinins** - chemical nature, biosynthesis, physiological effects and mode of action.

**Abscisic acid** - chemical nature, biosynthesis, physiological effects and mode of action.

**Physiology of flowering** : Photoperiodism and vernalization.

body specificity, monoclonal antibodies and their uses, antibody engineering, antibody types of vaccines, preliminary account of Biofilms, Biofilms, bioenzymes and bioreactors.

Unit-III

Plant Pathology

6. History and scope of plant pathology - General account of diseases caused by plant pathogens, pathogen attack and defense mechanisms. Physical, physiological, biochemical and molecular aspects.

Plant disease management: Chemical, biological, IPM systems, development of transgenics, bioprotection and disease clinics. Preliminary account of application of biotechnology in plant pathology.

Unit-IV

Symptomatology, identification and control of following plant diseases:

Rust of wheat (Tilletia), Rust of Sunflower (Helminthosporium), ergot and smut of cereals (Ustilago).

Red rot of sugarcane (Colletotrichum), Cotton (Wilt), Grapes (Downy mildew and powdery mildew).

Bacterial blight of wheat (Tilletia), Citrus canker.

Viral diseases: Tobacco mosaic, Bacterial yellow mosaic, Phytoplasma diseases - Little leaf of citrus.

Nematode diseases: Root-knot of vegetables.

Skeleton Paper

B.Sc. (Previous) Group-I Practical Examination

Time : 6 Hours

Q.No.	Questions	Marks Allowed
1.	(a) Perform the given molecular biology exercise.	16
	(b) Perform the given exercise of cell molecular biology.	15
2.	(a) Perform the given exercise of Cell Biology.	16
	(b) Perform the given exercise of Cell Biology. Polyacrylamide gels.	16
3.	(i) Identify the dye from the given illustration. Draw labelled diagrams. Deduce from the significant characters and systematic.	2
	(ii) Make a suitable preparation of <i>Amoeba</i> . Show reproductive parts of the organism.	3
	(iii) Draw well-labelled diagrams of <i>Amoeba</i> giving reasons.	3
	(iv) Make a suitable preparation of <i>Amoeba</i> . Show reproductive parts of the organism. Write (any) two points.	3
4.	Identify the organism (as)	16
5.		15
6.		15

Skeleton Paper

B.Sc. (Previous) Group-II Practical Examination

Time : 6 Hours

Time : 150

Q.No.	Questions	Marks Allowed
1.	(a) Describe the material in the illustration. Assign it to the relevant family and draw a flow chart.	9

## & REPRODUCTIVE BIOLOGY

### Unit I

**Introduction:** Unique features of plant development, differences between animal and plant development

**Seed germination and seedling growth:** Metabolism of proteins and mobilization of food reserves, tropisms during seed germination and seedling growth, hormonal control of seedling growth, gene expression, use of mutants in understanding seedling development.

**Shoot development:** Organization of the shoot apical meristem (SAM), cytological and molecular analysis of SAM, control of cell division and cell to cell communication, Primary and Secondary tissue differentiation, control of tissue differentiation, especially xylem and phloem, secretory ducts and laticifers, wood development in relation to environmental factors.

### Unit II

**Leaf growth and differentiation:** Inception, phyllotaxy, control of leaf form (leaf meristems and other factors), differentiation of epidermis (with special reference to stomata and trichomes) and mesophyll, Kranz anatomy, Leaf traces and leaf gaps, transfer cells.

**Root development:** Organization of root apical meristem (RAM), vascular tissue differentiation, lateral roots, root hairs, root-microbe interactions.

**Seed coat development:** External and internal morphology of seed, seed appendages, ontogeny of seed coat in various families, mature structure, spermoderm patterns.

### Unit III

**Reproduction :** Vegetative options and sexual reproduction, flower development, genetics of floral organ differentiation, homeotic mutants in Arabidopsis and Antirrhinum, sex determination.

27

Male gametophyte : Structure of anthers, microsporogenesis, role of tapetum, pollen development and gene expression, male sterility, sperm dimorphism and hybrid seed production, pollen germination, pollen tube growth and guidance, pollen storage, pollen allergy, pollen embryos.

Female gametophyte : Ovule development, megasporogenesis, organization of the embryo sac, structure of the embryo sac cells.

Pollination, pollen-pistil interaction and fertilization : Floral characteristics, pollination mechanisms and vectors, structure of the pistil, pollen-stigma interactions, sporophytic and gametophytic self-incompatibility (cytological, biochemical and molecular aspects), double fertilization, in vitro fertilization.

#### Unit IV

Seed development and fruit growth : Endosperm development, embryogenesis, cell lineages during late embryo development, storage proteins of endosperm and embryo

Polyembryony, apomixis, embryo culture, dynamics of fruit growth, biochemistry and molecular biology of fruit maturation.

Latent life - dormancy: importance and types of dormancy, seed dormancy, overcoming seed dormancy, bud dormancy.

Senescence and programmed cell death (PCD) : Basic concepts, types of cell death, PCD in the life cycle of plants, metabolic changes associated with senescence and its regulation, influence of hormones and environmental factors on senescence.

### Suggested Laboratory/Field Exercises

1. Study of living shoot apices by dissections using plants such as *Tabernaemontana*, *Albizia*
2. Study of cytohistological zonation in the shoot apical meristem (SAM) in sectioned and double-stained permanent slides of a suitable plant. Examination of shoot apices in a monocotyledon in both T.S. and L.S. to show the origin and arrangement of leaf primordia.
3. Study of alternate and distichous, alternate and superposed, opposite and superposed, opposite and decussate leaf arrangement. Examination of rosette plants (*Launaea*, *Mollugo*, *Raphanus*, *Hyoscyamus* etc.) and induction of bolting under natural conditions as well as by GA treatment.
4. Microscopic examination of vertical sections of leaves such as *Eucalyptus*, *Ficus*, *Mango*, *Nerium*, maize, grass and wheat to understand the internal structure of leaf tissues and trichomes, glands etc. Also study the leaf anatomy C3 and C4 of plants.
5. Study of epidermal peels of leaves such as *Coccinia*, *Tradescantia* etc. to study the development and final structure of stomata and prepare stomatal index.
6. Study of types of stomata in plants belonging to different families.
7. Study of whole roots in monocots and dicots.
8. Examination of L.S. of root from a permanent preparation to understand the organization of root apical meristem and its derivatives. (use maize, aerial roots of banyan etc.)
9. Study of lateral root development.
10. Study of leguminous roots with different types of nodules.
11. Study of primary and secondary tissue differentiation in roots and shoots.
12. Study of seed coat types- *Pisum*, *Cucurbita*, wheat.
13. Study of vascular tissues by clearing technique
14. Study of microsporogenesis and gametogenesis in sections of anthers of different ages.
15. Examination of modes of anther dehiscence and collection of pollen grains for microscopic examination (maize, grasses, *Cannabis sativa*, *Crotolaria*, *Tradescantia*, *Brassica*, *Petunia*, *Solanum melongena*, etc.)
16. Study of wall layers of anther.
17. Tests for pollen viability using stains and in vitro germination.
18. Pollen germination using hanging drop and sitting drop cultures, suspension culture and surface culture.

20. Study of ovules in cleared preparations, study of monosporic, bisporic and tetrasporic types of embryo sac development through examination of permanent, stained serial sections.
21. Field study of several types of flower with different pollination mechanisms.
22. Emasculation, bagging and hand pollination to study pollen germination.
23. Study of nuclear and cellular endosperm through dissections and staining.
24. Isolation of zygotic globular, heart-shaped, torpedo stage and mature embryos from suitable seeds
25. Polyembryony in citrus, jamun (*Syzygium cumini*) etc. by dissections.
26. Biochemical estimation (qualitative and quantitative) of metabolites of seeds.

## Paper VIII. PLANT ECOLOGY

### Unit I

Science of Ecology: Introduction to ecology, evolutionary ecology, ecological models, Population: Characteristics of population, population size and exponential growth, limits of population growth, population dynamics, life history pattern, fertility rate and age structure, population growth. Competition and coexistence, intra-specific interactions, interspecific interactions, scramble and contest competition model, mutualism, commensalism and allelopathy, prey-predator interactions.

Vegetation organization: Concepts of community and continuum, community coefficients, interspecific associations, ordination, species diversity and pattern diversity in community, concept of habitat and ecotone, ecological niche.

### Unit II

Vegetation development: Temporal changes (cyclic and non-cyclic), mechanism of ecological succession (relay floristic and initial floristic composition), succession models (facilitation, tolerance and inhibition models), Changes in ecosystem properties during succession, concept of climax

Ecosystems: Nature and size of ecosystem, components of an ecosystem (producers, consumers and decomposers), Grazing (grassland) and Detritus food chain in freshwater ecosystems, food webs, Ecological energetic: Solar radiation and energy intakes at the earth's surface, energy flow models, Productivity of various ecosystems of the world and global biogeochemical cycles of carbon and nitrogen. *Ecological services*

### Unit III

Ecosystem stability: Concept (resistance and resilience), ecological perturbations (natural and anthropogenic) and their impact on plant and ecosystems, Restoration of degraded ecosystems, ecology of plant invasion, Environment impact assessment, ecosystem restoration

*P. J. Jay*  
Dy. Registrar  
University of Rajasthan  
Jaipur

(22)

Biomes. Biodiversity: Major biomes of the world and Impact of changing climate on biomes. Biodiversity (Concept & level, role of biodiversity in ecosystem function and stability, assessment (local, national and global), speciation and extinction, Biodiversity act of India and related international conventions, diversity indices, IUCN Categories of threat, Hot spots.

#### Unit IV

Conservation: Conservation (ex-situ and in situ) and management, International Conservational organizations, sustainable development, natural resource management in changing environment, molecular ecology, genetic analysis of single and multiple population, molecular approach to behavioural ecology, conservation genetics.

Energy: Sources, Fossil fuels, Nuclear fuel, Solar Energy, Fuel Cells, Biomass, Hydropower, Wind Power, Geothermal, Tidal & Wave energy, Energy conservation

Home - Biodiversity. Major Themes of the course are: (1) Evolutionary ecology, (2) community ecology, (3) population ecology, (4) conservation biology, (5) global species diversity, (6) diversity and diversity indices, (7) conservation of threatened species, (8) conservation of biodiversity, (9) conservation of threatened hotspots.

#### Unit IV

Conservation - Conservation *in situ* and *in situ* and management, International Conservation organizations, sustainable development, natural resource management in changing environment, molecular ecology, genetic analysis of single and multiple population, molecular approach to behavioural ecology, conservation genetics.

Energy - Sources, Fossil fuels, Nuclear fuel, Solar Energy, Fuel Cells, Biomass, Hydropower, Wind Power, Geothermal, Tidal & Wave energy, Energy conservation

#### Suggested Readings

*Suggested Laboratory Exercises*

1. To determine minimum size and number of quadrat required for reliable estimate of biomass in grasslands.
2. To compare protected and unprotected grassland (using community coefficients/similarity indices).
3. To estimate IVI of the species in a grassland/woodland using quadrat method.
4. To determine gross and net phytoplankton productivity by light and dark bottle method.
5. To determine soil moisture content, porosity and bulk density of soils collected from varying depths at different locations.
6. To determine the Water holding capacity of soils collected from different locations.
7. To determine percent organic carbon and organic matter in the soils of cropland, grassland and forest.
8. To estimate the dissolved oxygen content in eutrophic and oligotrophic water samples by side modification of Winkler's method.
9. To estimate chlorophyll content in SO<sub>2</sub> fumigated and unfumigated plants leaves.
10. To estimate rate of carbon dioxide evolution from different soil using soda lime or alkali absorption method.
11. To estimate biomass and species diversity of soil invertebrates using a pitfall trap.

Paper - IX: Plant Resource Utilization and Conservation  
Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No. 1 which will be compulsory. The question No. 1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, true/false answer type, one word type and fill in the blanks type. *a limit of 20 words*

Unit-I

Plant Biodiversity : Concepts, status in India, utilization and concerns.

Sustainable development : Basic Concepts, Origins of agriculture

World centres of primary diversity of domesticated plants. The Indo-Burmese centre, plant introductions and secondary centres.

Unit-II

Origins, evolution, botany cultivation and uses of : (i) Food forage and fodder crops, (ii) fibre crops, (iii) medicinal and aromatic plants, and (iv) vegetable oil-yielding crops

Unit-III

Important fire-wood and timber-yielding plants and non-wood forest products (NWFPs) : such as bamboos, rattans, raw materials for paper making, gums, tannins, dyers, resins and fruits.

Green revolution : Benefits and adverse consequences. Innovations for meeting world food demands.

*Poj / Jais*

By Registrar  
(Academic)  
University of Rajasthan  
JANPUR

Plants used as avenue trees for shade, pollution control and aesthetics, Principles of conservation, extinctions, environmental status of plants based on International Union for Conservation of Nature.

#### Unit-IV

Strategies for conservation—*in situ* conservation—International efforts and India's initiatives, protected areas in India—sanctuaries, national parks, biosphere reserves, wetlands, mangroves and coral reefs, conservation of wild biodiversity.

Strategies for conservation—*ex situ* conservation—Principles and practices, botanical gardens, field gene banks, seed banks, in vitro repositories, cryobanks, general accounts of the activities of Botanical Survey of India (BSI), National Bureau of Plant Genetic Resources (NBPGR), Indian Council of Agricultural Research (ICAR), Council of Scientific and Industrial Research (CSIR), and the Department of Biotechnology (DBT) for conservation, non-formal conservation efforts.

Suggested Laboratory Exercises

The Practical course is divided into three units : (1) Laboratory work, (2) Field survey, and (3) Scientific visits.

Laboratory Work

Food Crops: Wheat, rice, maize, chickpea (Bengal gram), potato, tapioca, sweet potato, sugarcane, morphology, anatomy, microchemical tests for stored food materials.

Forage/ fodder crops : Study of any five important crops of the locality (for example fodder sorghum, bajra, berseem, lucerne, guar bean, gram, Ficus sp.)

Plant fibres :

(a) Textile fibres : cotton, jute, linen, sun hemp, Ramie

(b) Cordage fibres : coir

(c) Fibres for stuffing : silk cotton or kapok

Morphology, anatomy, (microscopic) study of whole fibres using appropriate staining procedures.

Medicinal and aromatic plants : Depending on the geographical location college/university select five medicinal and aromatic plants each from a garden crop field (or from the wild only if they are abundantly available).

*Papaver somniferum*, *Atropa belladonna*, *Colchicum foscus*, *Adiantum ceylanica* (syn *A. yucca*) *Allium sativum*, *Calophylla serpentina*, *Withania somnifera*, *Phyllanthus niruri*, (*P. fraternus*), *Andropogon paniculatus*, *Albizia lebbekii*, *Centotheca arvensis*, *Rosa* sp., *Pogostemon cablin*, *Origanum vulgare*, *Valeriana zizanioides*, *Jasminum grandiflorum*, *Solanum sp.*, *Pandanus odoratissimus*.

Study of live or herbarium specimens or other material to become familiar with these resources.

Vegetable Oils : Mustard, groundnut, soybean, cocconut, sunflower, castor, Morphology, microscopic structure of the oil-yielding tissues, tests for oil and iodine number.

Gums, resins, tannins, dyes : Perform simple tests for gums and resins. Prepare a water extract of vegetable dyes (*Albizia*, *Terminalia*, mangroves, tea, *Cassia* spp., *Mycena*) and dyes (turmeric, *Bixa orellana*, indigo, *Batesia*, *Lawsonia inermis*) and perform tests to understand their chemical nature.

(39)

**4. Survey**

**Firewood and timber yielding plants and NTFPs :**

Prepare a short list of 10 most important sources of firewood and timber in your locality. Give their local names, scientific names, and families to which they belong. Mention their properties.

Prepare an inventory of the bamboos and rattans of your area giving their scientific and local names and their various uses with appropriate illustrations.

A survey of a part of the town or city should be carried out by the entire class, in batches. Individual students will select one avenue/road and locate the trees planted on a graph paper. They will identify the trees, mention their size, canopy shape, blossoming and fruiting period and their status (healthy, diseased, infested, mutilated, misused or dying) and report whether or not the conditions in which they are surviving are satisfactory. The individual reports will be combined to prepare a large map of the area, which can be used for subsequent monitoring either by the next batch of students/teachers/local communities/NGOs or civic authorities. The purpose of exercise in item C above is to make the students aware of the kinds of trees and value in urban ecosystems and ecological services.

**Scientific Visits**

Students should be taken to one of the following :

- A protected area (biosphere reserve, national park, or a sanctuary)
- A wetland
- A mangrove
- National Bureau of Plant Genetic Resources, New Delhi-110012 or one of its field stations.
- Head Quarters of the Botanical Survey of India or one of its Regional Circles.
- A CSIR Laboratory doing research on plants and their utilization.
- An ICAR Research Institute or a field station dealing with one major crop or crops.
- A recognised botanical garden or a museum (such as those at the Forest Research Institute, Dehradun, National Botanical

University of Rajasthan  
& JAIPUR

(40)

Institute, Lucknow, Tropical Botanical Garden and Research Institute, Trivandrum), which has collection of plant products.

Note: The students are expected to prepare a brief illustrated narrative of the field survey and scientific visits. After evaluation, the grades awarded to the students by the teachers should be added to the field assessment of the practical examination.

Paper-X : Biotechnology and Genetic Engineering of Plants and Microbes

Schemes of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blank type with a limit of 20 words.

Unit-I

Biotechnology : Basic concepts, principles and scope.

Plant Cell and tissue culture : General introduction, history, scope, concept of cellular differentiation, totipotency.

Organogenesis and adventive embryogenesis : Fundamental aspects of morphogenesis : somatic embryogenesis and androgenesis, mechanisms, techniques, and utility.

Unit-II

Somatic hybridization : Protoplast isolation, Fusion and culture, hybrid selection and regeneration, possibilities, achievements and limitations of protoplasts research.

Applications of plant tissue culture : Clonal propagation, artificial seed, production of hybrids and somaclones, production of secondary metabolites/natural products, cryopreservation and germplasm storage.

Recombinant DNA technology : Gene cloning principles and techniques, construction of genomic DNA libraries, choice of vectors, DNA synthesis and sequencing, polymerase chain reaction, DNA finger printing.

Unit-III

Genetic engineering of plants : Aims strategies for development of transgenics (with suitable examples), Agrobacterium - natural genetic engineer, T-DNA and transposon mediated gene targeting, chloroplast transformation and its utility, intellectual property.

Raj / Jas

Dy. Registrar  
Academic  
University of Rajasthan  
JAIPUR

(41)

rights, possible ecological risk and ethical concerns.  
Microbial genetic engineering: gene transformation, selection of recombinants and their characterization. Improvement of industrial microbes and microbial processes in biotechnology.

Genetics and protoplasts: Genetic engineering: mapping of genes, molecular markers for mapping, DNA libraries, artificial chromosomes, high throughput screening, transgenic plants, animal transgenic systems, gene therapy, gene cloning and gene expression.

Bioprocess: Computation, modelling, process development, product recovery.

~~type, one line answer type, one word type and fill in the blanks type.~~

Unit-I

Plant Pathology : History & Scope. Nature, Origin. & Evolution of parasitism. Biotic and abiotic pathogens, Pathogen factors in disease development. Penetration, infection and pathogenesis. Physiological specialisation in phytopathogenic microbes.

Unit-II

Host factors in disease development : Inoculum Potential, Phenomena of resistance and susceptibility. Protective and defence mechanisms in plants, Phytoalexins. Breeding for disease resistance plants.

Environmental factors in disease development : Epiphytotics and plant disease forecasting.

Unit-III

IPM, Application of biotechnology and information technology in pest management.

Molecular Plant Pathology : Molecular diagnosis, identification of genes and specific molecules in disease development, molecular manipulation of resistance. Non-parasitic diseases and control measures.

Unit-IV

Principle of Plant Protection, Physical, Chemical and biological control of plant diseases,

Classification and anatomy of galls : Some insect induced plant galls of Rajasthan, mechanism and physiology of insect galls.

Paper-XII (a) : Advanced Plant Pathology-II

Scheme of Examination

Max.Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No. 1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type.

with a limit of 20 words.

Fungal diseases : Symptomatology, disease identification and control of flag smut of wheat, covered smut of barley, blast of paddy, smut Jowar, Red rot of sugarcane, flax rust, early blight of potato.

Unit-II

Bacteria : Classification and nomenclature of bacterial plant

Raj Jais

Dy. Registrar  
(Academics)  
University of Rajasthan  
JAIPUR

115

pathogens. Methods of identification of bacterial diseases (Morphology, physiology, serology and pathogenicity).  
bacterial diseases : Brown rot of potato, blight of rice, soft rot of vegetables, Crown gall disease, angular leaf spot of cotton.

#### Unit-III

Virus, viroid and phytoplasma disease : Symptomatology and transmission of viral diseases; Potato virus X & Y, Tomato ring disease, mosaic, bunchy top of banana; viroids and important viroid diseases. Phytoplasma General account; Sesame phyllody, Spike disease of rice.

#### Unit-IV

Nematology : Brief history, classification and identification of important pathogenic nematodes. Morphology and anatomy of nematodes. Methods used in Nematology.  
Control of plant parasitic nematodes. Nematode Disease : Root-knot disease of wheat & barley, ear cockle of wheat, root-knot of rice.

46

Unit I

History of seed testing and its importance to agriculture, aims of seed testing, Seed- definition and its types. Sampling of seeds, purity analysis (physical and genetical), seed moisture content, germination test, rapid test of viability and evaluation, seedling evaluation, various methods of seed separation, cleaning, drying and Seed processing plant and its process.

Unit II

Gross architecture of seed structure of angiosperms, identification and structure of seeds of important crop plants with special reference to Rajasthan (wheat, pearl millet, mustard, gram, pea) and Identification of designated objectionable weeds at seed level. Physiology of seed germination; seed and seedling vigour.

Unit III

Principles of seed production, seed production in self and cross pollinated crops; hybrid seed production. Production of foundation and certified seeds; synthetic seed, terminator seed technology, Seed storage methods, principles for safe seed storage, effects of storage, mycotoxins- major groups, detection and detoxification, Deterioration of seeds in storage by micro-organisms, insects and rodents; control of seed deterioration.

Unit IV

Seed certification standards and quarantine regulations. International cooperation, International Seed Testing Association - Rules and recommendations, Certificates, other seed certificates; Indian Seeds Act and recent amendments, National and Regional Seed Corporations of India - their organisation, aims and functions. National and International Co-operation in Seed Pathology. Sanitary and phytosanitary (SPS) agreements of WTO.

List of suggested Practical exercises:

1. Structure of seeds of some crop plants (wheat, pearl millet, mustard, gram, and pea).
2. Preparation of inventory of designated objectionable weeds at seed level and identification.
3. Identification of seed coat cracking.
4. Study of physical purity of seed sample.

Raj Jais

47

Dy. Registrar  
(Academic)  
University of Rajasthan

5. Study of seed germination, seedling abnormality and seedling index.
6. Determination of moisture content of seeds.
7. TZ test for seed viability
8. Assay of enzymes in crop seeds.
9. Preparation of synthetic seeds.
10. Localization of starch, protein, lipids, tannins, phenols and lignin in seed sections.
11. Isolation and identification of storage fungi.
12. Preparation of phytosanitary certificate etc. of seed lot.

Paper XII (b): SEED SCIENCE & TECHNOLOGY -II

Unit I

Introduction and importance of Seed Pathology in modern agriculture. History of Seed Pathology. Various methods for testing seed borne fungi, bacteria and viruses (Dry seed examination, seed washing test, incubation methods, cultural, biochemical, serological, nucleic acid based methods).

Unit II

Mechanism of seed infection and its types, environment influencing seed infection, infected/contaminated part of seed, morphology and anatomy of seeds in relation to invasion, location of inoculum of the pathogen in seed- seed coat and pericarp, endosperm and perisperm and embryo.

Seed-borne diseases of some important crops with particular reference to the state of Rajasthan and India. Typical case of infection by: fungi (wheat- smuts and bunts, Sesame-charcoal rot; bacteria (Brassicas- black rot, cluster bean- bacterial blight); viruses (tomato mosaic virus, pea seed borne mosaic virus,) and nematodes (wheat- ear cockle, rice- white tip).

Unit III

Seed-borne inoculum, inoculum density and assessment of seed borne inoculum in relation to plant infection, epiphytotics due to seed borne inoculum, disease forecast based on infected seed samples, tolerance limits of seed borne pathogens.

Transmission of seed borne disease: Systemic and non- systemic seed transmission, types of disease transmission, mode of establishment and course of disease from seed to seedling and plant, factors affecting seed transmission.

Raj Jais  
Dy. Registrar

(Academic)  
University of Rajasthan  
JAIPUR

619

## Unit IV

Management of seed-borne disease, principles of control, seed treatments (physical, chemical and biological), mechanism of action of seed treatments, major seed treatments for important seed borne pathogens and their methods of application.

### List of suggested Practical exercises:

1. Dry seed examination of seed lots.
2. Isolation and identification of seed-borne mycoflora by standard blotter method.
3. Preparation of culture media (PDA and NA).
4. Plating seeds on PDA/NA for identification of seed borne fungi and bacteria.
5. Other methods of plating e.g. deep freezing; 2,4D- blotter method.
6. Water agar test tube seedling symptom test.
7. Study of any seed borne nematode disease.
8. Detection of bacterial and viral pathogens in seeds.
9. LOPAT tests for detection of seed- borne bacteria.
10. Nucleic acid based detection of seed borne pathogens.
11. Histopathology of infected seed samples.
12. Physical control of seed-borne pathogens.
13. Antibiotic/fungicidal assay against seed-borne pathogens
14. Biological control of seed borne pathogens.
15. Field visits: Crop fields, FCI, NSC, Seed testing Labs., quarantine station (e.g. NBPGR) etc.

## Paper XI (C): Ecosystem Ecology

### Unit I

Grassland Ecosystems - Characteristics of grasslands, stratification, grasslands and grazing, grasslands and drought, grassland and animal life, Grasslands types with special reference to Prairie and Savannah, Indian grasslands.

Forest Ecosystems - Stratification of the forest, Forest types -Boreal, Temperate and Tropical forests, Forest animal life

### Unit II

Freshwater Ecosystems -Classification of Freshwater Habitats, Lentic: Lakes & Ponds: Temperature and Oxygen stratification, Zonation based on light penetration, Flora and fauna, Productivity classes of lakes, Marshes and Swamps, Bogs, Lotic: Springs, Streams and Rivers.

Marine and Estuarine Ecosystems - Characteristics of marine environment: Salinity, Temperature and pressure, Zonation and Stratification, Tides, Estuarine ecosystem: Types of Estuaries, Flora and fauna, Estuarine productivity, Coral reef ecosystem, Mangrove ecosystem

### Unit III

Urban Ecosystem -Urban environment and Climatic conditions, additional physical complexes (modified surfaces including parking lots, roofs, and landscaping, buildings, transportation networks, infrastructure and public amenities), flora and fauna (human beings as largest macro consumer), Implications of urbanization: problems of air pollutants, drinking water supply, roads, waste disposal.

Rural ecosystems: Rural environment and climate, physical complexes (fields, agricultural elements and machines), Flora and fauna, Problems of discharge of chemical fertilizers, pesticides and drinking water. Management of waste, Principle; Social Forestry.

5. W. P. Cunningham and M. A. Cunningham. 2003. Principles of Environmental Science: Inquiry and Applications. Tata Mcgraw-Hill Publishing Company Limited, New Delhi

### *Suggested Laboratory Exercises*

1. Find out stomatal index of Xerophytes (Nerium, Calotropis, Zizyphus,) growing in your locality.
- Study of trichomes of xerophytes (Zizyphus, Lantana, Calotropis, Acaua) growing in your locality.
- Study spread of root system of a perennial species in the soil
- Study ecological adaptations of halophytes in your nearby area.

Unit I

Unit I

**Air Pollution:** Important Primary (CO, CO<sub>2</sub>, Particulates, Odour Producing compounds), Primary Photochemical reaction, Formation of air pollutants on Buildings & Monuments, pollution control (particulates and gaseous pollutants), depletion, control strategies;

Oxides of Sulphur & Nitrogen, H<sub>2</sub>S, Chlorine & Secondary Air Pollutants (Smog, Acid rain, ozone and peroxyacetyl nitrate in air), Effects on plants, man and animals; Biomonitoring, Air pollutants), Green belt, Ozone depletion, mechanism

Unit II

Unit II

**Water Pollution:** Eutrophication- Process and Control; metal Pollution, Treatment, Disposal & Recycling Minimum National Standards

Control; Oil Pollution, Thermal Pollution, Heavy metal Pollution, drinking water standards

**Solid & Hazardous waste management & collection, Shrinking waste streams: 3Rs (Reduce, Reuse & Recycle), Methods of disposal; Hazardous waste: Definition, disposal and management**

**Resource Recovery:** Solid wastes, Types, Management, Reduction, Recycle & Reuse), composting, energy recovery; Land fill, Open dumps, Exporting waste; Resource Recovery

Unit III

Unit III

**Climate Issues:** Greenhouse gases (CO<sub>2</sub>, CH<sub>4</sub>, CFCs), consequence of greenhouse effects (CO<sub>2</sub> feedback loops, Biodiversity erosion), Carbon footprints, Carbon sinks, Sensing technology in environmental studies, the future of planet earth.

N<sub>2</sub>O, CFCs: sources, trends and role) and utilization, global warming, sea level rise, carbon sequestration, Applications of GIS and Remote Sensing technology in environmental studies, the future of planet earth.

#### *Suggested Laboratory Exercises*

56

*Raj Jais*  
Dy. Registrar  
(Academic)  
University of Rajasthan  
JAIPUR

1. To estimate pH, EC and Secchi Disc transparency for polluted and unpolluted water bodies.
2. To estimate Chemical Oxygen Demand of polluted water sample.
3. To estimate Biological Oxygen Demand of polluted water sample.
4. To estimate inorganic phosphorus content in water samples collected from polluted and unpolluted water bodies.
5. To estimate Total hardness, calcium and magnesium content in water samples collected from polluted and unpolluted water bodies.
6. To estimate chloride content in water samples collected from polluted and unpolluted water bodies.
7. To estimate Total alkalinity in water samples collected from polluted and unpolluted water bodies.
8. To determine diversity indices (Shannon-Wiener, concentration of dominance, species richness, equitability and  $\beta$ -diversity) for polluted and unpolluted water bodies.
9. Chlorophyll content of plant species growing in polluted (along JLN Marg) and unpolluted habitat (Botany Department).

Paper-XI (d) : Advanced Plant Physiology-I

Scheme of Examination

Max.Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No. 1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type with a limit of 20 words.

Unit-I

Proteins and Enzymes : Techniques of protein purification,

protein sequencing and proteomics, enzyme kinetics, Michaelis-Menten equation and significance of  $K_m$  value, negative and positive cooperativity, enzyme nomenclature and EC number, catalytic mechanisms, acid-base catalysis, covalent catalysis, metal ion catalysis, electrostatic catalysis, catalysis through proximity-orientation effect and catalysis through transition state bonding, lysozyme as model enzyme for catalytic mechanism, regulation of enzyme activity; feed back and allosteric regulation, active sites, cozymes, activators and inhibitors, isoenzymes, ribozymes and abzymes.

Unit-II

Nucleotides : Biosynthesis of ribonucleotides (purines and pyrimidines), formation of deoxyribonucleotides, salvage purines, nucleotide degradation.

Vitamins : Water and fat-soluble vitamins, biochemical function of thiamine, riboflavin, nicotinic acid, pantothenic acid, pyridoxin, ascorbic acid, vitamin B<sub>12</sub>, ascorbic acid, vitamin A and Vitamin E.

Unit-III

Secondary Metabolites :

Coumarins and lignins : Structure and synthesis.

Insecticides : (pyrethrins and rotenoids) distribution, chemistry and function.

Tannins : distribution, synthesis and function.

Flavonoids and water-soluble pigments : Synthesis and function.

Hallucinogens : Distribution, chemistry and function.

Unit-IV

Alkaloids : Pyrrole, pyrrolidine, pyridine, polyacetylmorphine, tropane and indole alkaloids—their distribution, synthesis and function.

Saponins and saponinins : Sterols, steroids, steroidal alkaloids—their distribution, synthesis and function.

Cardiac glycosides : Their distribution, structure and function.

Paper XII (d) : Advanced Plant Physiology-II

Scheme of Examination

Max.Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory.

pulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type. With a limit of 20 words. Unit-I

**Plant growth regulators :** Natural and synthetic, biochemistry and physiological effects of brassinosteroids, jasmonic acid; salicylic acid, polyamines, morphactins and cyanogenic compounds.

**Signal transduction in plants :** Receptors and G-proteins, phospholipid signalling, role of cyclic nucleotides, calcium-calmodulin cascade, diversity of protein kinases and phosphatases, signal transduction mechanisms with special reference to: Gibberellin induced signal transduction, auxin induced signal transduction and cytokinin induced signal transduction.

#### Unit-II

**Stress physiology :** Plant responses to biotic and abiotic stresses, mechanism of biotic and abiotic stress resistance, plant defense mechanisms against water stress, salinity stress, metal toxicity, freezing and heat stress and oxidative stress.

#### Unit-III

**Photobiology-Photoreceptors, Phytochrome :** history, discovery, physiological properties, interaction between hormones, and phytochrome, role of different phytochromes in plant development and flowering, mechanism of phytochrome signal transduction. Physiology of flowering photo-periodism and vernalisation.

**Circadian rhythms in plants-Nature of oscillator, rhythmic outputs, entrainments (inputs) and adaptive significance.**

#### Unit-IV

**Tools and Techniques :** Principles and application of spectrophotometry, Principles of chromatography, partition chromatography, thin layer chromatography, ion-exchange chromatography, gas-liquid chromatography, high performance liquid chromatography, gel filtration, electrophoresis, isoelectric focusing, immobilized pH gradient, ultra centrifugation (velocity and density gradient), ELISA and RIA.

**Paper-XI (c) : Advanced Morphology and Morphogenesis-I**  
**Schemes of Examination** **Max.Marks : 100**

ulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple-choice type, one word answer type, one word type and fill in the blanks type. with a limit of 20 words. Unit-I:

Floral anatomy and its role in explaining the morphology of the stamen and Carpel, Placentation : Inferior ovary, Taxonomic significance of floral anatomy. Anatomy of the seed and pericarp and their economic significance.

Unit-II

Anther-Organizational relationship of anther tissues; ultrastructure aspect of microsporogenesis : Pollen-sporoderm pattern. Pollen analysis, pollen fertility and sterility, allergy due to pollen. Pollen pistil interaction, cytomorphology of style and stigma, ultrastructure of pollen ultrastructural studies on pollen tube growth in the style, chemotropism, fertilization. Viability, storage and germination of pollen.

Unit-III

Embryosac-Basic types and their interrelationships, ultrastructural aspects of embryosac development. Endosperm-Intraembryonic relationship of the major types of endosperms, morphology and role in embryo development. Embryo-Major types, embryogenetic laws; comparison of Soueges and Johansen's system; physiological factors controlling growth and differentiation of embryo;

Unit-IV

Apomixis—genogenesis, androgenesis, agri-horticultural importance. Embryological features of the following families : Santalaceae, Convolvulaceae, Podostemaceae, Cucurbitaceae, Scrophulariaceae, Ranunculaceae, Orobanchaceae, Lentibulariaceae.

Paper III (e) : Advanced Morphology and Morphogenesis-II  
Schemes of Examination Max Marks : 100

Each paper will have 3 questions, out of which a student has to attempt 2 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple-choice type, one word answer type, one word type and fill in the blanks type. with a limit of 20 words. Unit-I

Development and morphogenesis-shoot apex the apical cell,

60

Raj / Das  
Asst. Registrar  
(Academic)  
University of Rajasthan  
Jaipur

meristem, the subcellular and biochemical structure of the meristem. The mechanism of primordium initiation transition to flowering, growth and formation of organs. Experimental work on apical meristem, meristem culture and virus free plant, histochemical studies on apical meristems.

#### Unit-II

The phenomenon of morphogenesis-correlation, polarity, symmetry, differentiation, regeneration.

Morphogenetic factors : Physical, mechanical, chemical and genetic factors. molecular basis of morphogenesis in plants with special reference to work done in Arabidopsis.

#### Unit-III

Somatic embryogenesis-survey of somatic embryogenesis in angiosperms, direct somatic embryogenesis and embryogenesis from callus and protoplasts, cytology, physiology and genesis of somatic embryogenesis nutritional factors, hormonal factors and embryo rescue in wide hybridization.

Micropropagation advances and synthetic seeds.

Cell plating technique and isolation of mutant cell lines; auxotrophic mutants.

Mechanism involved in cell culture mutants.

Suspension culture and growth studies.

#### Unit-IV

Microtechniques for plant cultures. Fixation (FAA and glutaraldehyde) and embedding in paraffin and GMA, equipment and histological procedures. \*Transmission and scanning electron microscopy for plant protoplasts and cultured cells and tissues. Endosperm and ovary culture, control of fertilization; experimental work on embryology of parasitic plants. Role of plant tissue culture in crop improvement.

#### Paper-XI (f) : Biosystematics of Angiosperms-I

Schemes of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No 1 which will be compulsory. 61

**Unit-I**

Aims, components and principles of taxonomy, Alpha and Omega taxonomy, documentation, scope, significance and relationship of experimental and orthodox taxonomy, Evolutionary taxonomic classification.

**Unit-II**

Botanical gardens and Arboreta, Information from plant geography, Indian plant geographical regions, Role of Herbaria in taxonomy, Taxonomic literature, Taxonomic resource information (Data analysis coding of characters, statistics).

Principles, rules, rank of plant nomenclature, ICBN—Principles and important rules, type method, Principle of priority and its limitation, Name of hybrids and cultivars, Concept of Biocode.

**Unit-III**

Biosystematics Procedures : Steps of biosystematic studies, Biosystematic categories—Palynology, Cytology, Embryology, Anatomy and Histochemistry.

**Unit-IV**

Numerical taxonomy : Principles, Serum diagnosis Concepts, Phytochemistry Operational taxonomic units (OTU), Data processing and taxonomic studies, Taxometric methods for study of Population variation and similarity—Coding, Cluster analysis, cladistics.

Paper-XII (f) : Biosystematics of Angiosperms, II

Schemes of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type with a limit of 20 words.

**Unit-I**

Experimental taxonomy—Scope and Significance, Experimental categories. Relationship in experimental and orthodox taxonomy, Synthetic theory of evolution.

**Unit-II**

Concept of species, speciation, species classification, Concept of characters—analytic versus synthetic character, qualitative versus quantitative characters, good and bad characters, Taxonomic charac-

ter—Character weighing. Characters variation, its role in speciation and isolation.

#### Unit-III

Concept of population, its significance, pattern of phenetic variability, Geographical variability, Transplant experiments. Genotype—environmental interaction, Plasticity, Variation—cause of variation in population, Range of tolerance and phenotypic plasticity, Ecotypes—origin and differentiation, Taxonomic significance of ecotypes.

#### Unit-IV

Experimental taxonomy and hybridization, Role of hybridization in evolution, Stabilization of hybrids and amphidiploidy, introgression and segregation.

Method of analysis of hybrid complex, Introgressive hybridization, Taxonomic treatment of hybrid complex. Breeding barriers, epistasis pleiotropy. Biochemical systematics—method and principles. Systematic markers, chemotaxonomy.

Paper-XI (g) : Biotechnology-I

Scheme of Examination Max.Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type.

Unit-I

The concept of totipotency and history of development of plant tissue culture from Haberlandt to the present development of different PTC media and their nutritional components.

Plant tissue culture laboratory—facilities, operation and management, media preparation and handling; Sterile techniques.

Unit-II

Pathways of plant regeneration—proliferation of axillary buds, adventitious shoot bud proliferation, organogenesis and somatic embryogenesis from callus and suspension cultures.

Somatic embryogenesis—Survey of somatic embryogenesis in angiosperms. Zygotic versus somatic embryogenesis in monocots and dicots. Conifer somatic embryogenesis.

Unit-III

Pollen embryogenesis—Discovery of anther culture, survey of anther and pollen culture in dicots and monocots, pathways of pollen embryogenesis, cytology and of pollen embryogenesis, stages of pollen development. Haploids for breeding and selection of mutants.

Isolation and culture of protoplasts of grasses review of work done with special reference to rice, wheat and maize.

Propagation of ornamental plants by tissue culture. Application of tissue culture in forestry.

Micropropagation advances and synthetic seeds, use of ELISA methods to certify pathogen free plants.

Unit-IV

Quantification of tissue culture procedures : fresh and dry weight culture density by cell count, packed cell volume mitotic index.

Microtechniques for plant cultures—fixation (FAA and glutaraldehyde) and embedding in paraffin and GMA, equipment and histological procedures. Transmission and scanning electron microscopy for plant protoplasts, cells and tissues.

Staining procedures for chromosome analysis.

Paper-XII (g) : Biotechnology-II

Scheme of Examination

Max.Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short-objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type.

Unit-I

Transgenic plants—the concept and history of developments of transgenesis in plants.

*Agrobacterium*—mediated transformation.

Unit-II

Direct DNA transfer into intact plants cells—microprojectile, bombardment and chemical uptake of DNA by plant protoplasts.

Tools for genetic transformation—Transformation vectors, promoters, terminators and markers and reporter genes.

Unit-III

Regulation of heterologous gene expression—factors affecting gene expression, introns, plants transcriptional factors, gene silencing, antisense RNA.

Transgenic approaches to crop improvement—protection against biotic (virus, fungi, bacteria, nematode, insect, weed) and abiotic stress (salinity, drought, cold, metals), Nutritional quality improvement-golden rice and other developments. Extension of flower life, pigmentation and fragrance.

Unit-IV

Manufacture of valuable products—antigens, antibodies, edible vaccines, enzymes, proteins.

Benefits and risks of producing transgenic plants—IPR and regulatory requirements, field testing and regulations to release transgenic plants in India.
